Traumatic Brain Injury Rehabilitation For Everyday Adaptive Living 2nd Edition:

Traumatic Brain Injury Jennie Ponsford, Sue Sloan, Pamela Snow, 2012-10-12 Research into the rehabilitation of individuals following Traumatic Brain Injury TBI in the past 15 years has resulted in greater understanding of the condition. The second edition of this book provides an updated guide for health professionals working with individuals recovering from TBI. Its uniquely clinical focus provides both comprehensive background information and practical strategies for dealing with common problems with thinking, memory, communication, behaviour, and emotional adjustment in both adults and children. The book addresses a wide range of challenges from those which begin with impairment of consciousness to those occurring for many years after injury and presents strategies for maximising participation in all aspects of community life. The book will be of use to practising clinicians, students in health disciplines relevant to neurorehabilitation, and also to the families of individuals with traumatic brain injury. **Traumatic Brain Injury**, 2017-08-11 [Textbook of Traumatic Brain Injury](#)

Jonathan M. Silver, Thomas W. McAllister, David B. Arciniegas, 2018-12-13 Despite the increased public awareness of traumatic brain injury TBI, the complexities of the neuropsychiatric, neuropsychological, neurological, and other physical consequences of TBI of all severities across the lifespan remain incompletely understood by patients, their families, healthcare providers, and the media. Keeping pace with advances in the diagnosis, treatment, and science of TBI, the *Textbook of Traumatic Brain Injury* Third Edition comprehensively fills this gap in knowledge. Nearly all 50 chapters feature new authors, all of them experts in their field. Chapters new to this edition include biomechanical forces, biomarkers, neurodegenerative dementias, suicide, endocrine disorders, chronic disease management, and social cognition. An entirely new section is devoted to the evaluation and treatment of mild TBI, including injuries in athletes, military service members, and veterans, and children and adolescents. These chapters join newly updated sections on the assessment and treatment of the cognitive, emotional, behavioral, and other physical sequelae of TBI. The *Textbook of Traumatic Brain Injury* is a must read for all of those working in any of the multitude of disciplines that contribute to the care and rehabilitation of persons with brain injury. This new volume is also a potentially useful reference for policymakers in both the public and private sectors. *Christian and Faith-based Counseling for Brain Injury* Deana Adams, 2022-11-24 *Christian and Faith-based Counseling for Brain Injury* is the first book of its kind to offer faith-based therapy to address the emotional, cognitive, and mental health needs of individuals who have suffered a traumatic brain injury TBI. A highly researched piece of work, the book puts forth an innovative and effective method for not only addressing the challenges of a life-changing injury but also for creating a sense of purpose. Through the nuances of faith-based counselling, this book focuses on the spiritual and existential aspects of understanding the diagnosis and creating a purpose post-injury. It examines how brain injury can affect an individual by exploring the deficits of brain injury, the impact of brain injury, and the challenges specific to damage to certain brain lobes. It also describes the mental health issues such as depression, anxiety, grief, anger, and posttraumatic stress that can affect both

the survivor and their family members Offering targeted counseling techniques and adaptive strategies it shows how faith based counselors can effectively treat brain injury This book is valuable reading for all individuals invested in providing support to the TBI community It is aimed at counselors lay counselors healthcare professionals social workers psychotherapists seminary students and upper level graduate students It will further be of use to for clinicians working in the outpatient level of care and private practice settings
