Treading On Hallowed Ground Counterinsurgency Operations In Sacred Spaces:

Treading on Hallowed Ground C. Christine Fair, Sumit Ganguly, 2008-09-29 After America's Iraq adventure devolved into a debacle a chorus of commentators and analysts noted that the U.S. military had no plan to fight a counterinsurgency campaign. Given the failure of conventional tactics America in the last two years has redoubled its efforts to develop a new strategy to fight the Iraqi insurgency and has gone so far to place our leading counterinsurgency expert General David Petraeus in charge of the Iraq theater. In sum there seems to be a growing consensus that for better or worse counterinsurgency will be a core tactic in future American military campaigns. Iraq of course presents special problems to the U.S. because of the intensity of religious belief and sectarianism. How do we fight against an insurgency that so often strategically positions itself on hallowed ground, mosques and shrines? Yet Iraq is not unique. As the contributors to *Treading on Hallowed Ground* show, counterinsurgency efforts on religiously contentious terrain is a widespread phenomenon in recent times ranging from North Africa to Central and Southeast Asia. Here C. Christine Fair and Sumit Ganguly have assembled an impressive group of experts to explore the most important counterinsurgency efforts in sacred spaces in our era: churches in Israel, mosques and shrines in Iraq, the Sikh Golden Temple in India, mosques and temples in Kashmir, the Krue Se Mosque in Thailand, and the Grand Mosque in Saudi Arabia. Taken together the essays comprise the first comprehensive account of this increasingly pivotal component of contemporary war.

Organizational Cultures and the Management of Nuclear Technology Russell Kirk, 2017-07-05 Nuclear technology has been an organizing premise of the international system since 1945. Eight countries have officially acknowledged the possession of nuclear weapons. Many countries have harnessed the atom for electricity generation and other civilian uses. Roughly 440 commercial nuclear reactors operate in thirty countries providing 14 percent of the world's electricity. Volatile oil prices and concerns about climate change have led newly emerging economies in Asia to express keen interest in using nuclear energy to meet growing energy demands. Since the basic technological apparatus for both civilian and military nuclear programs is the same, there are concerns about the potential spread of dual-use technology. The future stability of the international order depends on the responsible management of their nuclear assets by nuclear powers. The relationship between civilian authorities and the military takes on special significance in states with nuclear weapons or near weapon capability. The constitutional balance of powers, the delegation of authority during wartime and peace, influences from public opinion and bureaucratic structures on the formulation of doctrine, crisis management and communications with the international media and the general public are influenced by civil-military relations and organizational culture. This volume will be of broad interest to scholars of civil-military relations, political science and political sociology.
