captures expert knowledge and serves as an essential resource that illustrates the latest level of knowledge about engine development. Particular attention is paid toward the most up to date theory and practice addressing thermodynamic principles, engine components, fuels and emissions. Details and data cover classification and characteristics of reciprocating engines along with fundamentals about diesel and spark ignition internal combustion engines including insightful perspectives about the history, components and complexities of the present day and future IC engines. Chapter highlights include Classification of reciprocating engines, Friction and Lubrication, Power efficiency, fuel consumption, Sensors, actuators and electronics, Cooling and emissions, Hybrid drive systems. Nearly 1 800 illustrations and more than 1 300 bibliographic references provide added value to this extensive study. Although a large number of technical books deal with certain aspects of the internal combustion engine, there has been no publication until now that covers all of the major aspects of diesel and SI engines. Dr Ing E h Richard van Basshuysen and Professor Dr Ing Fred Sch fer the editors, *Internal Combustion Engines Handbook: Basics, Components, Systems and Perspectives*. *Design and Development of Heavy Duty Diesel Engines* P. A. Lakshminarayanan, Avinash Kumar Agarwal, 2019-11-05. This book is intended to serve as a comprehensive reference on the design and development of diesel engines. It talks about combustion and gas exchange processes with important references to emissions and fuel consumption and descriptions of the design of various parts of an engine, its coolants and lubricants and emission control and optimization techniques. Some of the topics covered are turbocharging and supercharging, noise and vibrational control, emission and combustion control and the future of heavy duty diesel engines. This volume will be of interest to researchers and professionals working in this area. *History of Liquid Propellant Rocket Engines* George Paul Sutton, 2006.
