Oakley Jr.,2013-05-28 I agree with you on all the points you have listed Yet I still need the local congregation anonymous The Christian Right group of Churches have been consistently losing members for the last twenty years and do not have an inkling of the cause They have joined with the Republicans to try and enforce their will upon society They have failed in the last two elections as indicated by the election of Barak Obama This of course gives rise to speculation about the root basis for their beliefs and actions This group of people claim allegiance to the whole Bible and claim that it is Gods Word Many people in light of modern knowledge are laughing at these old time beliefs Our society is in need of a credible way of life The Bible has the right answer but it is mixed in with much misleading information that the Churches have used to control society The Churches have organized in such a way as to eliminate criticism They have assumed the office of Gods representative and members can be punished for disobeying their edicts using discrimination and loss of fellowship The Christian Right groups have refused to study and update their antiquated standards This book is written to encourage the first step of this change *Teachers' Reading/Teachers' Lives* Mary Kay Rummel,Elizabeth P. An,2015-10-27 Benjamin An has discovered the human hand structure which explains why humans are born to hit with an implement and to throw with a trajectory release Hitting and throwing became the most powerful actions in the

animal kingdom These actions became the primary tools for humans to survive historically Survival skills become sports actions in the modern civilized world Different sports were invented with modification of the sports actions Dr An has looked into these actions seriously in terms of human nature intellectually biomechanically psychologically physically and mentally in order to help athletes perform these actions without confusion Many performance problems occur just because these actions are parts of human nature and humans know too much about these actions For example for every action a human knows the results of this action It is very hard for a human to concentrate on the actions only and ignore the results of these actions Thinking about the results has become one of the most serious interferences of that action itself Dr An calls these intellectual interferences Human physical actions are complicated by human mental thoughts and intellectual understandings Sports actions are not just physical actions Sports actions have to be modified if it is necessary and executed with specific mental thoughts in order to fit in any specific sport The author has specifically emphasized on these points in his book Social Studies and Diversity Education Elizabeth E. Heilman, Ramona Fruja, Matthew Missias, 2010-01-21 The preparation of social studies teachers is crucial not only to the project of good education but even more broadly to the cultivation of a healthy democracy and the growth of a nation's citizens This one of a kind resource features ideas from over 100 of the field's most thoughtful teacher educators reflecting on their best practices and offering specific strategies through which future teachers can learn to teach thus illuminating the careful planning and deep thinking that go into the preparation of the social studies teachers While concentrating on daily teaching realities such as lesson planning and meeting national state or provincial standards each contributor also wrestles with the most important current issues on educating teachers for today's increasingly diverse complex and global society Features of this unique teaching resource include Volume sections that are arranged by both disciplinary organization and approach or activity Thoughtful introductory section essays that conceptualize each theme providing a conscientious theoretical overview and analysis of each individual section Rich and concrete examples of best practice from some of the field's most diverse and highly regarded scholars and teacher educators An index that identifies the appropriate teaching level and teacher education context and links the strategies and ideas that are presented in the essay to the relevant INTASC and NCSS standards for quick reference in classroom planning as well as institutional development and implementation A much needed addition to the field this comprehensive volume will be of value to any teacher interested in social studies or diversity education across age groups and educational contexts
