Weather as Medium Janine Randerson, 2018-10-30 An exploration of artworks that use weather or atmosphere as the primary medium creating new coalitions of collective engagement with the climate crisis In a time of climate crisis a growing number of artists use weather or atmosphere as an artistic medium collaborating with scientists local communities and climate activists Their work mediates scientific modes of knowing and experiential knowledge of weather probing collective anxieties and raising urgent ecological questions oscillating between the big picture systems view and a ground based perspective In this book Janine Randerson explores a series of meteorological art projects from the 1960s to the present that

draw on sources ranging from dynamic technological and physical systems to indigenous cosmology Randerson finds a precursor to today's meteorological art in 1960s artworks that were weather driven and infused with the new sciences of chaos and indeterminacy and she examines work from this period by artists including Hans Haacke Fujiko Nakaya and Aotearoa New Zealand kinetic sculptor Len Lye She looks at live experiences of weather in art in particular Fluxus performance and contemporary art that makes use of meteorological data streams and software She describes the use of meteorological instruments including remote satellite sensors to create affective atmospheres online projects and participatory performances that create a new form of social meteorology works that respond directly to climate change many from the Global South artist activists who engage with the earth's diminishing cryosphere and a speculative art in the form of quasi scientific experiments Art's current eddies of activity around the weather Randerson writes perturb the scientific hold on facts and offer questions of value in their place

Climate Change Brian C. Black, David M. Hassenzahl Ph.D., Jennie C. Stephens, Gary J. Weisel, Nancy Gift, 2013-01-08 This book provides a holistic consideration of climate change that goes beyond pure science fleshing out the discussion by considering cultural historical and policy driven aspects of this important issue Climate change is a controversial topic that promises to reframe rudimentary ideas about our world and how we will live in it The articles in *Climate Change An Encyclopedia of Science and History* are designed to inform readers decision making through the insight of scholars from around the world each of whom brings a unique approach to this topic The work goes beyond pure science to consider other important factors weighing the cultural historical and policy driven contributors to this issue In addition the book explores the ideas that have converged and evolved in order to clarify our current predicament By considering climate change in this holistic fashion this reference collection will prepare readers to consider the issue from every angle Each article in the work is suitable for general readers particularly students in high school and college and is intended to inform and educate anyone about climate change providing valuable information regarding the stages of mitigation and adaptation that are occurring all around us

Art and Future Peter Stupples, Jane Venis, 2018-04-18 This selection of essays examines the future of art in a changing world In particular contributors discuss the agency of art in conditions of ecological threats to the natural world to climate change and the effects of globalisation neoliberal economics and mass tourism Following the lead of Chicago based Frances Whitehead whose essay is a key text some contributors take positions on working with local government agencies to embed art thinking within development projects going back to the art thinking at the centre of Kazimir Malevich's work in Vitebsk one hundred years ago in Russia Other papers highlight small scale art interventions that bring ecological issues to public notice and suggest positive responses whilst others discuss large scale problems brought about by the social economic and laissez faire history of the emerging Anthropocene with possible dystopic outcomes

Art and Sustainability Sacha Kagan, 2014-03-15 What is the cultural dimension of sustainability This book offers a thought provoking answer with a theoretical synthesis on cultures of sustainability Describing how modernity

degenerated into a culture of unsustainability to which the arts are contributing Sacha Kagan engages us in a fundamental rethinking of our ways of knowing and seeing the world We must learn not to be afraid of complexity and to re awaken a sensibility to patterns that connect With an overview of ecological art over the past 40 years and a discussion of art and social change the book assesses the potential role of art in a much needed transformation process Theory in Contemporary Art since 1985 Zoya Kocur, Simon Leung, 2012-09-11 Updated and reorganized to offer the best collection of state of the art readings on the role of critical theory in contemporary art this second edition of Theory in Contemporary Art since 1985 brings together scholarly essays artists statements and art reproductions to capture the vibrancy and dissonance that define today s art scene Incorporates new and updated topics that have become central to art theory and practice over the past decade New and updated chapters cover such topics as international biennials historicizing of the term contemporary art aesthetics art and politics feminism and pornography ecology and art the Middle East and conflict studies Eastern European art and politics gender and war and technology Features a thematic reconfiguration of sections and new introductions to make readings user friendly Extensively illustrated throughout with an expanded color plate section New contributions to this edition include those by Alexander Alberro Claire Bishop T J Demos Anthony Downey Liam Gillick Marina Gr ini Mary Kelly Chantal Mouffe Beatriz Preciado Jacques Ranciere Blake Stimson and Chin Tao Wu *The Routledge Companion to Landscape Studies* Peter Howard, Ian Thompson, Emma Waterton, Mick Atha, 2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape The Companion contains thirty nine original contributions from leading scholars within the field which have been divided into four parts Experiencing Landscape Landscape Culture and Heritage Landscape Society and Justice and Design and Planning for Landscape Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in

relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies

Ecoarts practice is evolving quickly as a practice While much of it is made by individual artists working alone artists are increasingly combining into multi artist collectives and collaborating with scientists sustainability professionals industry or the community to develop artworks with quite far reaching effects This book describes an extraordinary range of artistic practices pitched to encourage people to adopt pro environmental behaviours by provoking persuading providing information creating empathy for nature or by being built into sustainability practices themselves It brings together 28 contributors who examine different roles of the arts in encouraging pro environmental behaviour There is a wide range of practitioners represented here including visual and performing artists sustainability professionals social researchers environmental educators research students and academics The contributors to this book are united in believing that the arts are vital in promoting pro environmental behavior in the way that they are practiced but also in the connections they make to ecology science and Indigenous culture **Thinking with the Harrisons** Anne Douglas,Chris Fremantle,2024-09-30 Helen Mayer

Harrison and Newton Harrison known as the Harrisons dedicated five decades to exploring and demonstrating a new approach to artistic practice centred on doing no work that does not attend to the wellbeing of the web of life Their collaborative practice pioneered a way of drawing together art and ecology They closely observed often with irony and humour how human intervention disrupts the dynamics of life as a web of interrelationships The authors of this book think with the Harrisons critically tracing their poetics as a reimagining and reconfiguring of the arts in response to the unfolding planetary crisis They draw parallels between the artists poetics and rethinking in the philosophy of science particularly drawing on the work of Isabelle Stengers and Alfred North Whitehead Thinking with the Harrisons is for anyone concerned with the implications of ecology as part of a reimagining of public life including through the interaction of art and science Throughout their joint practice the Harrisons sought to engage policy makers governments ecologists artists and inhabitants of specific places sensitizing us to the crises that emerge from grounded experiences of place and time Ecoart in Action Amara Geffen,Ann Rosenthal,Chris Fremantle,Aviva Rahmani,2022-02-01 Ready to go vetted approaches for facilitating artistic environmental projects How do we educate those who feel an urgency to address our environmental and social challenges What ethical concerns do art makers face who are committed to a deep green agenda How can we refocus

education to emphasize integrative thinking and inspire hope What role might art play in actualizing environmental resilience Compiled from 67 members of the Ecoart Network a group of more than 200 internationally established practitioners Ecoart in Action stands as a field guide that offers practical solutions to critical environmental challenges Organized into three sections Activities Case Studies and Provocations each contribution provides models for ecoart practice that are adaptable for use within a variety of classrooms communities and contexts Educators developing project and place based learning curricula citizens policymakers scientists land managers and those who work with communities human and other will find inspiration for integrating art science and community engaged practices into on the ground environmental projects If you share a concern for the environmental crisis and believe art can provide new options this book is for you *Landscape into Eco Art* Mark Cheetham,2018-02-14 Dedicated to an articulation of the earth from broadly ecological perspectives eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues In *Landscape into Eco Art* Mark Cheetham systematically examines connections and divergences between contemporary eco art land art of the 1960s and 1970s and the historical genre of landscape painting Through eight thematic case studies that illuminate what eco art means in practice reception and history Cheetham places the form in a longer and broader art historical context He considers a wide range of media from painting sculpture and photography to artists films video sound work animation and installation and analyzes the work of internationally prominent artists such as Olafur Eliasson Nancy Holt Mark Dion and Robert Smithson In doing so Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today s debates on climate science government policy and our collective and individual responsibility to the planet An ambitious intervention into eco criticism and the environmental humanities this volume provides original ways to understand the issues and practices of eco art in the Anthropocene Art historians humanities scholars and lay readers interested in contemporary art and the environment will find Cheetham s work valuable and invigorating **Climate Change and the New Polar Aesthetics** Lisa E.

Bloom,2022-08-08 Lisa E Bloom considers the way artists filmmakers and activists in the Arctic and Antarctic use their art to illustrate our current environmental crises and to reconstruct public understanding of them *Science Meets Art* John Potts,Nigel Helyer,2022-07-14 This book explores collaboration between artists and scientists and examines the ways in which scientific data and research findings can be communicated translated and transformed using the techniques of contemporary art and information technology Contemporary art forms including installation sculpture painting computer based art Internet art and interactive electronic artworks are able to provide new and creative outlets with expanded audiences for scientific research The book which features 75 illustrations of works created as a result of art science collaboration between scientists and artists is important in the field because it presents a thorough account of the collaboration through the eyes of a leading creative practitioner and a leading cultural theorist It contains a wide range of in

detail examples of successful collaborative works that illustrate the breadth and depth of contemporary interdisciplinary creative research approaches *Bioart Kitchen* Lindsay Kelley, 2016-03-07 What do new technologies taste like A growing number of contemporary artists are working with food live materials and scientific processes in order to explore and challenge the ways in which manipulation of biological materials informs our cooking and eating Bioart or biological art uses biotech methods to manipulate living systems from tissues to ecologies While most critiques of bioart emphasise the influences of new media digital media and genetics this book takes a bold alternative approach Bioart Kitchen explores a wide spectrum of seemingly unconnected subjects which when brought together offer a more inclusive expansive history of bioart namely home economics the feminist art of the 1970s tissue culture methodologies domestic computing and contemporary artistic engagements with biotechnology *Infowhelm* Heather Houser, 2020-06-16 How do artists and writers engage with environmental knowledge in the face of overwhelming information about catastrophe What kinds of knowledge do the arts produce when addressing climate change extinction and other environmental emergencies What happens to scientific data when it becomes art In *Infowhelm* Heather Houser explores the ways contemporary art manages environmental knowledge in an age of climate crisis and information overload Houser argues that the infowhelm a state of abundant yet contested scientific information is an unexpectedly resonant resource for environmental artists seeking to go beyond communicating stories about crises *Infowhelm* analyzes how artists transform the techniques of the sciences into aesthetic material repurposing data on everything from butterfly migration to oil spills and experimenting with data collection classification and remote sensing Houser traces how artists ranging from novelist Barbara Kingsolver to digital memorialist Maya Lin rework knowledge traditions native to the sciences entangling data with embodiment quantification with speculation precision with ambiguity and observation with feeling Their works provide new ways of understanding environmental change while also questioning traditional distinctions between types of knowledge Bridging the environmental humanities digital media studies and science and technology studies this timely book reveals the importance of artistic medium and form to understanding environmental issues and challenges our assumptions about how people arrive at and respond to environmental knowledge *Between Nature and Culture* Emily Brady, Isis Brook, Jonathan Prior, 2018-10-26 Within philosophy a new interest in aesthetics beyond the arts has encouraged the rapid growth of environmental aesthetics Within this literature however less attention has been given to the spaces and places that emerge from various nature culture interactions This has meant the relative neglect of types of environments to which the majority of people have access and interact with in a sustained manner In this respect these are the environments in which many of us understand and value nature Through a greater understanding of how humans interact with these environments and the types of relationships that emerge through this interaction we address seek to address this gap *Between Nature and Culture* provides a systematic philosophical account of the main issues and problems that pertain to the aesthetics of modified environments as well as new

insights concerning the generation and appreciation of landscapes and environments that fall between non human nature and human culture including gardens agricultural and ecologically restored landscapes and land and ecological art works
