Lab: Weather and Climate Factors

Climate describes the average weather over a long period of time (generally 30 years). The observations recorded in a climate can be useful and consistent. Averages should be in place over a long time period to get a more accurate picture of the climate.

Figure 1.1: Average Temperature (Figure 1.1)

1. The graph shows the average high temperature for each month in the United States. The average high temperature for each month is shown in the graph. The average high temperature for each month is shown in the graph. The average high temperature for each month is shown in the graph.
