What Are Universities For:

What are Universities For? Stefan Collini, 2012-02-23 Across the world universities are more numerous than they have ever been yet at the same time there is unprecedented confusion about their purpose and scepticism about their value What Are Universities For offers a spirited and compelling argument for completely rethinking the way we see our universities and why we need them Stefan Collini challenges the common claim that universities need to show that they help to make money in order to justify getting more money Instead he argues that we must reflect on the different types of institution and the distinctive roles they play In particular we must recognize that attempting to extend human understanding which is at the heart of disciplined intellectual enquiry can never be wholly harnessed to immediate social purposes particularly in the case of the humanities which both attract and puzzle many people and are therefore the most difficult subjects to justify At a time when the future of higher education lies in the balance What Are Universities For offers all of us a better deeper and more enlightened understanding of why universities matter to everyone

Speaking of Universities Stefan Collini, 2017-03-28 A devastating analysis of what is happening to our academia In recent decades there has been an immense global surge in the numbers both of universities and of students In the UK alone there are now over 140 institutions teaching more subjects to nearly 2.5 million students New technology offers new ways of learning and teaching Globalization forces institutions to consider a new economic horizon At the same time governments have systematically imposed new procedures regulating funding governance and assessment Universities are being forced to behave more like business enterprises in a commercial marketplace than centres of learning In *Speaking of Universities* historian and critic Stefan Collini analyses these changes and challenges the assumptions of policy makers and commentators He asks does marketization threaten to destroy what we most value about education does this new era of accountability distort what it purports to measure and who does the modern university belong to Responding to recent policies and their underlying ideology the book is a call to focus on what is actually happening and the clichés behind which it hides an incitement to think again think more clearly and then to press for something better

Who are Universities For? Tom Sperlinger, Josie McLellan, Richard Pettigrew, 2018-09-11 The university system is no longer fit for purpose UK higher education was designed for much smaller numbers of students and a very different labour market Students display worrying levels of mental health issues exacerbated by unprecedented levels of debt and the dubious privilege of competing for poorly paid graduate internships Meanwhile who goes to university is still too often determined by place of birth gender class or ethnicity Who are universities for argues for a large scale shake up of how we organise higher education how we combine it with work and how it fits into our lives It includes radical proposals for reform of the curriculum and how we admit students to higher education with part time study currently in crisis in England becoming the norm A short polemical but also deeply practical book Who are universities for offers concrete solutions to the problems facing UK higher education and a way forward for universities to become more inclusive and more responsive to
