What Does Reality Is An Illusion A Persisted One Actually Mean:

An Arrogant Nation That Creates Its Own Reality: Rogene A. Buchholz, 2019-11-13 Americans seem prone to create their own reality in situations that have faced them over the past several years and this arrogance cost the country dearly Three events stand out as prime examples this arrogance The first of these events was the war in Iraq which was based on the false reality that the country possessed weapons of mass destruction and had ties to terrorist organizations The second example was the financial crisis of 2008 which was precipitated by the invention of new and complicated investment vehicles The last example is the current Trump administration which was filled with falsehoods during the campaign and his first years in office such that one could not believe anything that this administration said This book is going to focus on religious reasons for this situation as I believe that it is the Christian religion that is largely at fault for this condition It is religion that has set up most Americans to believe our leaders when they outright lie and claim to know things beyond what the evidence will support and create a false reality that eventually comes crashing down to disrupt American life If our nation is ever going to be great it must quit living in a fantasy world and give up a belief in magic as far as its future is concerned Decisions in government and business must be based on reality as it is and not on what we arrogantly think we can create The two go together as the more we try and create our own reality the less able we are to come to grips with the reality that actually exists The place to start is by recognizing the role the Christian religion has played in this phenomenon and letting go of the fantasies that comprise this religion and live a secular life that finds meaning and purpose in this world rather than in some hereafter We will not successfully deal with all the problems with which we are faced and have a political and economic system that works for everyone until this happens The Gods Are The Same Fools That We Are Foxwitz

Chamberlain, 2023-02-14 As a writer I've imagined a lot of things And I've placed many theories on their own heads Theories about the fantastical nature of the deities Of course beyond religious beliefs and what not it's often at the tail end of life that people often sort of solve the mystery of the universe Sometimes that never happens It's not a commonplace thing to figure out the mystical truth of things when life is full of itself Thus we wait and have to keep waiting for the end of the day culmination of things But as an artist writer there are several imaginary conversations I've had with myself and the creative impulses that I have within me And oftentimes the converse of many things I imagine is that the alternate universe is much more ridiculous than humans are willing to deal with All Is One Ren Koi, 2022-03-25 WOW what a great book As a person who has been in the world of recovery for 30 years it goes straight to the heart of the missing piece for most alcoholics and addicts Dr Robb Kelly The Addiction Doctor Despite centuries of analyses and debates between scientists and philosophers consciousness remains puzzling and controversial It is the most familiar yet mysterious aspect of our lives There might be different levels of consciousness or different kinds of consciousness or just one kind with different features Modern research into the human brain is yet to provide conclusive answers and we don't know if animals insects or plants are conscious or

even the universe itself The contrasting range of research suggests that a new approach might be needed one that includes both an objective scientific view and a subjective philosophical and spiritual view in order to unlock the mystery All Is One investigates how consciousness fits into a larger picture of the universe by exploring what science philosophy religion and spirituality have to say on the matter and offers a conclusive definition of consciousness that might satisfy both the scientifically oriented and spiritually oriented reader

What It All Means Salah,2011-11-04 What It All Means is a fresh formulation of the perennial philosophy addressed to the serious spiritual seeker in the twenty first century Author Salah weaves together Eastern and Western wisdom traditions personal mystical experiences and modern scientific discoveries to produce a portrait of the universe that is completely different from how it appears to our senses In What It All Means you will discover that the universe is ultimately spiritual not material and that it is alive self aware and infinitely intelligent More dramatically you will see that your human life is similar to an illusion a dream or an image in a mirror that your true nature is one with the Source of the universe and is therefore eternal formless pure awareness untouched by the limitations of the material world What It All Means is a book that just may change your life undoubtedly for the better Open it anywhere and read a couple of pages You won't be disappointed

The New Nihilism Costantino Esposito,2024-11-01 In this highly engaging book Costantino Esposito argues that nihilism is not merely the loss of the classic values of the Western tradition rather it presents a critical opportunity to ask pertinent timely questions about the meaning of self and the world Nihilism is a problem that has troubled the culture philosophy and worldview of people and societies for more than a century a problem that seemed thanks to the advance of cultural relativism to have become an obvious and globally shared condition However in recent years the conversation around nihilism has begun to change The questions that nihilism once declared impossible to answer questions about the ultimate meaning of self and reality the truth of the person and history our desire to understand ourselves in relation to the infinite are reemerging in today's culture and proving to be profound reasonable and of vital importance In its classical form nihilism is the loss of values and ideals but its modern iteration manifests as an irreducible need more basic but far more challenging Esposito suggests that rather than being an obstacle nihilism can become an opportunity to search for true meaning for our experiences in the world With philosophical rigor he intercepts and narrates this new phenomenon focusing on social trends poetic voices philosophical and scientific visions ethical problems and aesthetic experiences The New Nihilism unravels and makes sense of the real stakes of the existential crisis of our time

Hawkins, M.D., Ph.D., 2013-08-01 Experience spiritual enlightenment and personal transformation from world renowned author psychiatrist clinician spiritual teacher and researcher of consciousness David R Hawkins M D Ph D This book combines consciousness studies with transpersonal psychology providing an accessible gateway into the deeper dimensions of self and reality It concludes the presentation of a long predicted major advance in critical human knowledge It explains and describes the very substrate and essence of consciousness as it evolved from its primordial appearance as life on earth on up through evolution as the human

ego and hence to the ego's transcendence as the spiritual Reality of Enlightenment and the Presence of Divinity. It completes the description of the evolution of human consciousness from the level of approximately 800 to its peak experience at 1 000 which historically has been the ultimate possibility in the human domain. This is the realm of the mystic whose truth stems solely from the radical subjectivity of divine revelation. The text of the material is taken from lectures, dissertations and dialogues with students, visitors and spiritual aspirants from around the world who have different spiritual and religious backgrounds and varying levels of consciousness. On the referenced Scale of the Levels of consciousness which calibrates the levels of Truth from 1 to 1 000, Power versus Force calibrates at 850, The Eye of the I at 980 and the final volume of the trilogy I calibrates at a conclusive 999.8. The uncommon clarity and lucidity with which the highly evolved subject matter is presented facilitates understanding. As with the reading of Power versus Force or The Eye of the I, the reader's level of consciousness increases measurably as a consequence of exposure to this material itself which is presented from a powerful field of exposition. Conflict is resolved within the mind of the student by means of recontextualization which solves the dilemma. Argument and adversity are resolvable by identifying the positionalities of the ego which are the basis of human suffering. Some Chapters Include: The Process, Spiritual Purification, The Ego and Society, Spiritual Reality, Realization, The Realization of Divinity, The Radical Reality of the Self, The Mystic, The Levels of Enlightenment, The Nature of God, The Obstacles Transcending the World, The Emotions, Mind Considerations, Karma, The Final Doorway, The Transcendence, The Inner Path, No Mind, The Way of the Heart, The Recontextualization, Spiritual Research, Homo Spiritus. This masterpiece is a revolutionary tool for personal transformation blending quantum physics with spirituality and a perfect read for anyone seeking enlightenment and a deeper understanding of the universe.

Illusion in Cultural Practice Katharina Rein, 2021-11-25. This volume explores illusionism as a much larger phenomenon than optical illusion, magic shows or special effects as a vital part of how we perceive, process and shape the world in which we live. Considering different cultural practices characterized by illusionism, this book suggests a new approach to illusion via media theory. Each of the chapters analyses a specific kind of illusionistic practice and the concept of illusionism it entails in a given context including philosophy, perception and cognitive theory, performance, magic, occultism, optics, physiology, early cinema, cartomancy, spiritualism, architecture, shamanic rituals and theoretical physics to show the diversity of shapes that illusionism and illusions can take. The book provides detailed analyses of illusions within performance and ritual, magic, philosophy, art history and psychology as well as a first approach to the study of illusions outside of these established fields. It aims to find ways of identifying and analysing a wider range of illusions in the humanities. This multidisciplinary and comprehensive volume will appeal to scholars and students with an interest in media and culture, theatre and performance, philosophy, sociology, politics and religion. This publication was supported by the Internationales
