What Intellectual History:

What is Intellectual History? Richard Whatmore, 2016-05-18 What is intellectual history Those who practice intellectual history have described themselves as eavesdroppers upon the conversations of the past explorers of alien ideological worlds and translators between historic societies and our own while their critics have often derided them as narrow minded studying the ideas of dead white men Some consider the discipline to be among the most important in the humanities and social sciences because it facilitates a better understanding of contemporary ideological programmes and facilitates their rational evaluation In this engaging and refreshing introduction to the field Richard Whatmore begins by examining the historical development of intellectual history before dissecting its various methodological debates He presents various alternative ways in which we should think about intellectual history as well as presenting his own very clear definition of the field Drawing on a wide range of historical examples Whatmore shows how ideas philosophical political religious scientific artistic originated in their historical context and how they were both shaped by and helped to shape the societies in which they originated He ends by casting a critical eye over the current state of intellectual history and a brief discussion of how it might develop in the future What is Intellectual History will become an essential textbook for scholars and students of intellectual history philosophy politics and the humanities

Global Intellectual History Samuel Moyn, Andrew Sartori, 2013-06-25 Where do ideas fit into historical accounts that take an expansive global view of human movements and events Teaching scholars of intellectual history to incorporate transnational perspectives into their work while also recommending how to confront the challenges and controversies that may arise this original resource explains the concepts concerns practice and promise of global intellectual history featuring essays by leading scholars on various approaches that are taking shape across the discipline The contributors to Global Intellectual History explore the different ways in which one can think about the production dissemination and circulation of global ideas and ask whether global intellectual history can indeed produce legitimate narratives They discuss how intellectuals and ideas fit within current conceptions of global frames and processes of globalization and proto globalization and they distinguish between ideas of the global and those of the transnational identifying what each contributes to intellectual history A crucial guide this collection sets conceptual coordinates for readers eager to map an emerging area of study

The Descent of Ideas Donald R. Kelley, 2002 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry

between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

The ^AWorlds of American Intellectual History Joel Isaac,James T. Kloppenberg,Michael O'Brien,Jennifer Ratner-Rosenhagen,2016-11-15 The Worlds of American Intellectual History follows American thinkers and their ideas as they have crossed national institutional and intellectual boundaries The volume explores ways in which American ideas have circulated in different cultures It also examines the multiple sites from social movements museums and courtrooms to popular and scholarly books and periodicals in which people have articulated and deployed ideas within and beyond the borders of the United States *A Companion to Intellectual History* Richard Whatmore,Brian Young,2015-11-06 A Companion to Intellectual History provides an in depth survey of the practice of intellectual history as a discipline Forty newly commissioned chapters showcase leading global research with broad coverage of every aspect of intellectual history as it is currently practiced Presents an in depth survey of recent research and practice of intellectual history Written in a clear and accessible manner designed for an international audience Surveys the various methodologies that have arisen and the main historiographical debates that concern intellectual historians Pays special attention to contemporary controversies providing readers with the most current overview of the field Demonstrates the ways in which intellectual historians have contributed to the history of science and medicine literary studies art history and the history of political thought Named Outstanding Academic Title of 2016 by Choice Magazine a publication of the American Library Association **Rethinking Modern European Intellectual History** Darrin M. McMahon,Samuel Moyn,2014-03 This book is a collection of essays by leading practitioners of modern European intellectual history reflecting on the theoretical and methodological underpinnings of the field The essays each attempt to assess their respective disciplines giving an account of their development and theoretical evolution while also reflecting on current problems challenges and possibilities **The Descent of Ideas** DonaldR. Kelley,2017-09-29 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the

current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

Intellectual History of Economic Normativities Mikkel Thorup, 2016-06-20 The book investigates the many ways that economic and moral reasoning interact overlap and conflict both historically and at present The book explores economic and moral thinking as a historically contingent pair using the concept of economic normativities The contributors use case studies including economic practices such as trade and finance and tax and famine reforms in the British colonies to explore the intellectual history of how economic and moral issues interrelate

Islam, Orientalism and Intellectual History Mohammad R. Salama, 2011-03-30 Debates on the relationship between Islam and the West rage on from talk of clashing civilizations to political pacification from ethical and historical perspectives to distrust xenophobia and fear Here Mohammad Salama argues that the events of 9 11 force us to engage ourselves fully without preconditions in understanding not just the history of Islam as a religion but of Islam as a historical condition that has existed in relationship to the West since the seventh century Salama compares the Arab Islamic and European traditions of historical thought since the early modern period focusing on the watershed moments that informed the two traditions ideas of intellectual history and perceptions of one another He draws attention to European intellectual history's entangled links with the Islamic philosophy of history especially the complexities of orientalism and modernity Recent critical reflections on the work of Ibn Khaldun confirm this intertwined and troubled relationship reflecting major disparities and contradictions At the same time recent Arab writings on Europe's intellectual history reveal a struggle against erasure and intellectual superiority Calling for a new understanding of the relationship between Islam and the West Salama argues that Islam has played a major role in enabling and positioning various paths of Western historiography at crucial moments of its development leaving palpable imprints on Islamic historiography in the process He proposes an answer to a fundamental question how to make sense of the mechanics of production in Arab Islamic and Western historiographies or how to identify the ways in which they have both failed to make sense of themselves and of each other in an increasingly disenchanted postnationalist world Spanning an impressive array of recent writings on these themes as well as older foundational texts in both traditions including al Tabar Ibn Khaldun Hegel al Jabart Toynbee Foucault Edward Said and Hourani this book is both timely and crucial for all those interested in Islamic and Middle Eastern studies Western and Islamic philosophies of history modernity and the relationship between Islam and the West

Intellectual History in Contemporary South Africa M. Eze, 2016-04-30 In examining the intellectual history in contemporary South Africa Eze engages with the emergence of ubuntu as one discourse that has become a mirror and aftermath of South Africa's overall historical narrative This book interrogates a triple socio political representation of ubuntu as a displacement narrative for South Africa's colonial consciousness as offering a new national imaginary through its inclusive consciousness in which different competing and often antagonistic memories and histories are accommodated and

as offering a historicity in which the past is transformed as a symbol of hope for the present and the future This book offers a model for African intellectual history indignant to polemics but constitutive of creative historicism and healthy humanism
