

When a rod is held with nylon, a PVC rod gives electrons a little push. The rod has been charged by friction. Even though the rod is being brought near, the rod keeps its charge. What is responsible for the charges in the sphere?

- When the rod is near the neutral sphere, the charges move to the left. What causes electrons to move without any contact and spread out as far as possible. In the first diagram, draw an arrow showing the direction the electrons move. When the rod is removed, the sphere is left with a net charge. The process is charging, induction and the sphere is charged. In the second diagram, draw the net charge on the sphere.

- The following series makes a positive rod and charged rod. In each case, draw the arrangement that charge distribution has had.

- Charging a sphere charge without touching is called induction. The side of the object closest to the charging distribution is charge that is like same as, opposite that side the charging rod. The process is charging, induction.

- Draw the lines on the electrostatic lines, and use if positive and if negative charges shows the charge distribution in each case.

Intro to Meteorology & Astronomy Parent Lesson Planner, 2014-09-09 Introduction to Meteorology and Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Meteorology The Earth was created to be the dwelling place of man It is a complex world and its weather patterns affect our lives every day Whether you live near the equator a polar region or somewhere in between knowledge of the weather is important The Weather Book will teach you why our exact distance from the sun allows life on earth how the weather on the other side of the earth affects you how clouds form and how to identify the different types what the difference is between a cold and warm front why you can often see lightning long before you can hear thunder how to build your own weather station how to survive in dangerous weather what the greenhouse effect and the ozone hole are what Noah s flood and the Ice Age have in common how weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you ll have more of an understanding about what is going on miles above your head And when you hear a weather report on television you will understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What s out there Our universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of space exploration black holes do they exist the origin and age of the moon why Mars doesn t support life the composition of stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the stars and in comet trails The more we learn the less we fear Radiologic Science Stewart C. Bushong,1984 **Energy Around Us Gr. 4-7** Doug Sylvester,1997-01-01 In this powerful unit students examine the very nature of energy its many forms and the changes it can undergo Students learn basic concepts and information as they go through a series of student notes The notes are followed by meaningful activities associated with the theme of each lesson To further captivate student interest many of these activities have been designed around the Science Challenge Format in which small groups of students work cooperatively to solve various problems Learning integrated with fun is the order of the day and your science class may never be as energetic This Physical Science lesson provides a teacher and student section with a variety of reading passages activities crossword

There is no clear explanation for static potential generation There are many factors that affect charge generation such as environment temperature humidity structural polymer type structure of fabric and working factors fabric speed tension and contact area between fabric and machine parts material type that is in contact with fabric With a good knowledge of these parameters generation of static charge can be minimized During production static potential on a moving web can cause web breakage ignition of flammable atmosphere or shock risk The main objective of this research is to develop a method to measure static electricity on moving nonwoven machine belts In this project the instruments to measure and eliminate static potential on moving fabrics design of test apparatus relationship between charge decay values and charge generation of different fabrics static potential measurements under different conditions are discussed Spunbond technology is one of the nonwoven production methods have a high static charge generation problem tests were done by using a spunbond belt on an actual spunbond machine These belts are mostly made of woven fabrics with different structures different number of layers fabric design structure of polymers used A goal of manufacturing these belts is to reduce static electricity during production Among all parameters that cause static charge generation tension is the most important one A small amount of increase in tension can double the charge on belt Separation is also a reason for charge generation and as roller fabric friction increases because of the increased contact area more charge will be generated during separation A new parameter contact area also needs to be considered Static charge generation may not be same at cross direction on a belt As all areas are in the same situation working and environment conditions the only thing that was different was the tension Because of the spunbo
