Transformations In Slavery Transformations In Slavery:

Transformations in Slavery Paul E. Lovejoy, 2000-08-28 This history of African slavery from the fifteenth to the early twentieth century examines how indigenous African slavery developed within an international context Professor Lovejoy discusses the medieval Islamic slave trade and the Atlantic trade as well as the enslavement process and the marketing of slaves He considers the impact of European abolition and assesses slavery's role in African history The book corrects the accepted interpretation that African slavery was mild and resulted in the slaves assimilation The new edition incorporates recent research revised statistics on the slave trade demography and an updated bibliography

Transformations in Slavery Paul E. Lovejoy, 2012 This history of African slavery from the fifteenth to the early twentieth centuries examines how indigenous African slavery developed within an international context The new edition revises statistical material and incorporates recent research

The Atlantic World Toyin Falola, Kevin D. Roberts, 2008-04-16 This ambitious work provides an overview of the Atlantic world since the 15th century by exploring the major themes that define the study of this region Contact with Europeans in Africa and the Americas the slave trade gender and race in the early Atlantic world independence movements in Africa Caribbean nationalism and gender and identity in the 20th century are just a few subjects discussed Moving beyond the micro histories of the scholarly monograph to connect the fruits of those researches with broader events and processes this book in the editors words makes a concerted effort to re connect elites and non elites Old World and New early modern and modern and economics and culture It will be a point of embarkation for a new generation of students of the Atlantic world

Transformations in History Toyin Falola, 2024-11-04 The book uses the main body of Lovejoy's work to speak to core African and economic history issues It thoroughly examines Lovejoy's contributions to the study of Africa particularly in exploring issues around production and exchanges at local regional and international levels The book offers readers a fresh perspective on the discourse of slavery and colonialism while simultaneously introducing them to the quality of work already accomplished by a stellar scholar As the book argues Lovejoy presents verifiable historical data that nudges us to reconsider our perception of Africa's growth trajectory especially before its encounter with the Americas A chapter examines the various ways by which the people experienced slavery before it became proliferated during the time Europeans entered into the business Another chapter addresses questions about the progressive efforts of slave traders to access the interior to drive more victims who would be shipped to the Atlantic for the business of servitude to advance the European economy Alongside this exploration a provides the background as to the contributions of Africans to ensure the continuity of this business Lovejoy notes for instance that Muslims were found in every region in the Americas during slavery which indicates that they were being taken there through transatlantic slavery While Muslims were found in these areas it was not true that they were there in large numbers This is underscored by their resistance to all forms of forced extraction of the people from their homeland In essence they challenged the system in ways that redefined their participation in the exercise

The book analyzes how Muslims ensured that economic and political power were withdrawn from the hands of the victims and how they systematically created institutions that promoted that very inequity Lovejoy's extensive knowledge allows us to develop theories and establish applicable methodologies for understanding African reality since the precolonial era He presents original perspectives about addressing issues of African American engagements and the roles of critical voices in the diaspora Consequently the book is an invaluable educational resource particularly for people who want to deepen their understanding of African social and economic history

Sustainability Transformations Across Societies Björn-Ola Linnér, Victoria Wibeck, 2019-10-03

A comparison of how societal actors in different geographical political and cultural contexts understand agents and drivers of sustainability transformations

Slave Emancipation and Transformations in Brazilian Political Citizenship Celso Thomas Castilho, 2016-09-03 Celso Thomas Castilho offers original perspectives on the political upheaval surrounding the process of slave emancipation in postcolonial Brazil He shows how the abolition debates in Pernambuco transformed the practices of political citizenship and marked the first instance of a mass national political mobilization In addition he presents new findings on the scope and scale of the opposing abolitionist and sugar planters mobilizations in the Brazilian northeast The book highlights the extensive interactions between enslaved and free people in the construction of abolitionism and reveals how Brazil's first social movement reinvented discourses about race and nation leading to the passage of the abolition law in 1888 It also documents the previously ignored counter mobilizations led by the landed elite who saw the rise of abolitionism as a political contestation and threat to their livelihood Overall this study illuminates how disputes over control of emancipation also entailed disputes over the boundaries of the political arena and connects the history of abolition to the history of Brazilian democracy It offers fresh perspectives on Brazilian political history and on Brazil's place within comparative discussions on slavery and emancipation

What Is a Slave Society? Noel Lenski, Catherine M. Cameron, 2018-05-10

The practice of slavery has been common across a variety of cultures around the globe and throughout history Despite the multiplicity of slavery's manifestations many scholars have used a simple binary to categorize slave holding groups as either genuine slave societies or societies with slaves This dichotomy as originally proposed by ancient historian Moses Finley assumes that there were just five genuine slave societies in all of human history ancient Greece and Rome and the colonial Caribbean Brazil and the American South This book interrogates this bedrock of comparative slave studies and tests its worth Assembling contributions from top specialists it demonstrates that the catalogue of five must be expanded and that the model may need to be replaced with a more flexible system that emphasizes the notion of intensification The issue is approached as a question allowing for debate between the seventeen contributors about how best to conceptualize the comparative study of human bondage
