Transforming Criminal Justice? Jane Donoghue, 2014-04-03 Why is punishment not more effective Why do we have such high re offending rates How can we deal with crime and criminals in a more cost effective way Over the last decade in particular the United Kingdom in common with other jurisdictions such as Canada the United States US and Australia has sought to develop more effective ways of responding to criminal behaviour through court reforms designed to address specific manifestations of crime Strongly influenced by developments in US court specialisation problem solving and specialist courts including domestic violence courts drugs courts community courts and mental health courts have proliferated in Britain over the last few years These courts operate at the intersection of criminal law and social policy and appear to challenge much of the traditional model of court practice In addition policy makers and practitioners have made significant attempts to try to embed problem solving approaches into the criminal justice system more widely Through examination of original data gathered from detailed interviews with judges magistrates and other key criminal justice professionals in England and Wales as well as analysis of legislative and policy interventions this book discusses the impact of the creation and development of court specialisation and problem solving justice This book will be essential reading for students and academics in the fields of criminology criminal justice criminal law socio legal studies and sociology as well as for criminal justice practitioners and policy makers

Restorative Justice in Transition Kerry Clamp, 2013-09-05 This book explores how restorative justice is used and what its potential benefits are in situations where the state has been either explicitly or implicitly involved in human rights abuses Restorative justice is increasingly becoming a popular mechanism to respond to crime in democratic settings and while there is a burgeoning literature on these contexts there is less information that focuses explicitly on its use in nations that have experienced protracted periods of conflict and oppression This book interrogates both macro and micro utilisations of restorative justice including truth commissions criminal justice reform and the development of initiatives by communities and other non state actors The central premise is that the primary potential of restorative justice in responding to international crime should be viewed in terms of the lessons that it provides for problem solving rather than its traditional role as a mechanism or process to respond to conflict Four values are put forward that should frame any restorative approach engagement empowerment reintegration and transformation It is thought that these values provide enough space for local actors to devise their own culturally relevant processes to achieve longstanding peace This book will be of interest to those conducting research in the fields of restorative justice transitional justice as well as criminology in general

Framework of Criminal Justice Michael King, 2023 In The Framework of Criminal Justice originally published in 1981 the criminal justice process is analysed by using six models each of which expresses a different justification for criminal justice and punishment the due process model exacting justice between equal parties the crime control model punishing wrong and preventing further crime the bureaucratic model controlling crime and criminals the medical model rehabilitating offenders the status passage model publicly denouncing the crime and criminal and the power model maintaining domination by the ruling class and reinforcing class values The study examines the formal rules and procedures of the magistrate court system within the context of these models and also discusses the roles of the actors police defendant magistrate court clerks and lawyers Next the study depicts eight scenes that occur from the defendant's arrest through a court hearing to sentencing It assesses how closely the activity and behaviour within the system follow the formal protections granted by the British system of justice and it concludes that the process is far more complex and the rules far more open to interpretation than is commonly believed The book suggests that this miscalculation has led to the failure of various reforms special attention is given to the Bail Reform Act of 1976 and two sections of the Criminal Law Act of 1977 It further suggests that real reform must depend upon an understanding of the political nature of the criminal justice system
