

TRANSNATIONAL CONFLICTS

Central America,
Social Change,
and Globalization

A man with a mustache, wearing a wide-brimmed straw hat and a dark jacket, is sitting on a large, light-colored rock. He is looking back over his shoulder towards the camera. A colorful, patterned bag with yellow, red, and blue designs is resting on the rock next to him. The background is a solid, deep red color.

Transnational Conflicts William I. Robinson, 2003-10-16 Capitalism has disrupted the conventional pattern of revolutionary upheaval civil wars and pacification in Central America William Robinson maps the shape of change in the region

West African Studies Borders and Conflicts in North and West Africa OECD, Sahel and West Africa Club, 2022-02-19 This publication examines the role of border regions in shaping patterns of violence since the end of the 1990s in North and West Africa Using the innovative OECD Spatial Conflict Dynamics indicator SCDi the report looks at the growing relationship between political violence and borderlands at the regional level by analysing more than 170 000 violent events between January 1997 and June 2021 and through the exploration of case studies in the Central and Eastern Sahel

Transnational Conflicts and International Law Constantin von der Groeben, 2014-11-06 Ever since 9 11 the legal classification of transnational conflicts between states and non state armed groups such as Al Qaeda has become a highly debated topic While repeatedly referred to as the War on Terror the legal qualification of the conflict between the US and Al Qaeda remains controversial US military operations in Afghanistan against Al Qaeda and the use of drones against alleged terrorists in Pakistan Yemen and other states pose the question as to whether this conflict truly qualifies as one single global war Similarly transnational conflicts such as the Colombian operation against a FARC base in Ecuador Israel s fight against Hezbollah in Lebanon and Turkish operations against the PKK in northern Iraq pose difficulties as they transcend individual nations political systems and geographical borders Whether the law of war i e humanitarian law is applicable to such conflicts and to what extent human rights law binds the states involved is debated This work aims to provide structure to the current debate and analyzes the applicability of both humanitarian law and human rights law Furthermore it examines and explores approaches to enhance and develop the existing legal framework including proposed new legal regimes for transnational conflicts The author argues against the strict separation of international humanitarian law and human rights law and instead borrows from Colombian authorities experience in their struggle with the FARC to develop an alternate solution combining both legal regimes in an integrated approach

The International Spread of Ethnic Conflict David A. Lake, Donald Rothchild, 2020-10-06 The wave of ethnic conflict that has recently swept across parts of Eastern Europe the former Soviet Union and Africa has led many political observers to fear that these conflicts are contagious Initial outbreaks in such places as Bosnia Chechnya and Rwanda if not contained appear capable of setting off epidemics of catastrophic proportions In this volume David Lake and Donald Rothchild have organized an ambitious sophisticated exploration of both the origins and spread of ethnic conflict one that will be useful to policymakers and theorists alike The editors and contributors argue that ethnic conflict is not caused directly by intergroup differences or centuries old feuds and that the collapse of the Soviet Union did not simply uncork ethnic passions long suppressed They look instead at how anxieties over security competition for resources breakdown in communication with the government and the inability to make enduring

commitments lead ethnic groups into conflict and they consider the strategic interactions that underlie ethnic conflict and its effective management How why and when do ethnic conflicts either diffuse by precipitating similar conflicts elsewhere or escalate by bringing in outside parties How can such transnational ethnic conflicts best be managed Following an introduction by the editors which lays a strong theoretical foundation for approaching these questions Timur Kuran Stuart Hill Donald Rothchild Colin Cameron Will H Moore and David R Davis examine the diffusion of ideas across national borders and ethnic alliances Without disputing that conflict can spread James D Fearon Stephen M Saideman Sandra Halperin and Paula Garb argue that ethnic conflict today is primarily a local phenomenon and that it is breaking out in many places simultaneously for similar but largely independent reasons Stephen D Krasner Daniel T Froats Cynthia S Kaplan Edmond J Keller Bruce W Jentleson and I William Zartman focus on the management of transnational ethnic conflicts and emphasize the importance of domestic confidence building measures international intervention and preventive diplomacy

Peacemaking in International Conflict I. William Zartman, 2007 This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations **International Law and the Classification of Conflicts** Elizabeth

Wilmshurst, 2012-08-02 International law separates international from non international conflicts This book discusses how this categorisation operates identifying the legal questions raised Case studies show how this impacts on issues like detention in armed conflict and the relationship between human rights and humanitarian law **Gender, Conflict and**

International Humanitarian Law Orly Maya Stern, 2018-07-27 This book conducts a gendered critique of the principle of distinction in international humanitarian law IHL with a focus on recent conflicts in Africa The principle of distinction is core to IHL and regulates who can and cannot be targeted in armed conflict It states that civilians may not be targeted in attack while combatants and those civilians directly participating in hostilities can be The law defines what it means to be a combatant and a civilian and sets out what behaviour constitutes direct participation Close examination of the origins of the principle reveals that IHL was based on a gendered view of conflict which envisages men as fighters and women as victims of war Problematically this view often does not accord with the reality in new wars today in which women are playing increasingly active roles often forming the backbone of fighting groups and performing functions on which armed groups are highly reliant Using women's participation in new wars in Africa as a study this volume critically examines the principle through a gendered lens questioning the extent to which the principle serves to protect women in modern conflicts and how it fails them By doing so it questions whether the principle of distinction is suitable to effectively regulate the conduct of hostilities in new wars This book will be of much interest to students of international law gender studies African politics war and conflict studies and international relations Conflict Resolution in the Twenty-first Century Jacob Bercovitch, Richard Dean Wells Jackson, 2009-09-08 In the past arbitration direct bargaining the use of intermediaries and deference to

international institutions were relatively successful tools for managing interstate conflict. In the face of terrorism, intrastate wars and the multitude of other threats in the post Cold War era, however, the conflict resolution tool kit must include preventive diplomacy, humanitarian intervention, regional task sharing and truth commissions. Here Jacob Bercovitch and Richard Jackson, two internationally recognized experts, systematically examine each one of these conflict resolution tools and describe how it works and in what conflict situations it is most likely to be effective. *Conflict Resolution in the Twenty first Century* is not only an essential introduction for students and scholars, it is a must have guide for the men and women entrusted with creating stability and security in our changing world. Cover illustration iStockphoto.com [Armed Groups and International Legitimacy](#) William Plowright, 2021-02-23. This book analyses the issue of child soldiers in order to understand how armed groups engage with international organizations to gain international legitimacy. The work examines why some armed groups follow the rules of international humanitarian law and others do not. It argues that armed groups in conflicts around the world engage with international organizations in order to gain international legitimacy and to show they are following the laws of war. By examining the issue of child soldiers in contemporary armed conflict, the volume establishes a typology of which groups will engage with international actors and follow the laws of war and which will not. The main aim of the book is to understand the rationality of even the most violent of actors and to understand when and how armed groups can be encouraged to follow the laws of war. The work draws from extensive primary research conducted among armed groups in Syria and Myanmar, including al Qaeda, the Islamic State and the many small ethnic insurgent groups of Myanmar. This book will be of much interest to students of war and conflict studies, security studies, international humanitarian law and International Relations. [Environmental Management in Practice: Vol 1](#) Paul Compton, Dimitri Devuyt, Luc Hens, Bhaskar Nath, 2013-01-11. Focuses on the instruments and tools currently available to the environmental manager. A theoretical background to the instruments is given together with an overview of those instruments that are in common use today, with particular attention to the physical, economic, legislative and communication instruments. [Armed Conflict Survey 2023](#) The International Institute for Strategic Studies (IISS), 2023-12-06. The Armed Conflict Survey 2023 provides an exhaustive review of the political, military and humanitarian dimensions of active armed conflicts globally in the period from 1 May 2022 to 30 June 2023. The review is complemented by a strategic analysis of regional and global drivers and conflict outlooks, providing unique insights into the geopolitical and geo-economic threads linking conflicts regionally and globally, as well as into emerging flashpoints and political risks to monitor. This edition's regional focused approach also includes Regional Spotlight chapters on selected key conflict trends of regional and global importance. Reflecting the growing significance of geopolitical factors in shaping current conflict trends across the world, the Armed Conflict Survey 2023 features the third edition of the IISS Armed Conflict Global Relevance Indicator, which compares the global relevance of armed conflicts in terms of their geopolitical impact as well as their human impact and intensity. This edition also includes maps, infographics, key statistics.

and the accompanying Chart of Armed Conflict *Conflict and Transformation* Christian Joerges, 2022-10-06 In this important compendium one of the leading scholars of EU law and its legal framework reflects on his previous writings in the context of current challenges the European project is facing More than a simple restatement it offers an important theoretical comment at this defining time for EU law The author offers a welcome counterbalance to what some perceive to be a surfeit of optimism when assessing the EU and its development In so doing Professor Joerges identifies three flaws in the current European ideology Firstly he points to the intellectual weakness of the integration through law ideology Secondly the book sets out the systematic neglect of the economic and its political dynamics Finally it addresses the complacency with respect to Europe's darker legacies This is an important critical and candid assessment of Europe at its half century

Kenneth Watkin, Andrew J. Norris, 2012 Examines the legal issues surrounding non international armed conflict NIAC in the modern era **The Law of Non-International Armed Conflict** Sandesh Sivakumaran, 2012-08-09 The Law of Non International Armed Conflict brings together and critically analyses the disparate conventional customary and soft law relating to non international armed conflict All the relevant bodies of international law are considered including international humanitarian law international criminal law and international human rights law The book traces the changes to the legal framework applicable to non international armed conflict from ad hoc regulation in the nineteenth and early twentieth century to systematic regulation through the 1949 Geneva Conventions and 1977 Additional Protocols to the transformation of the law in the mid 1990s Armed conflicts ranging from the US civil war the Algerian War of Independence and the attempted secession of Biafra through to the current conflicts in the Colombia the Philippines and Sudan are all considered The identification and analysis of the law is complemented by a consideration of the practice allowing both violations of and respect for the law to be ascertained Given that non international armed conflicts are fought between states and non state armed groups or between armed groups particular attention is paid to the oft neglected views of armed groups This is done

through an analysis of hundreds of statements unilateral declarations internal regulations and bilateral agreements issued by armed groups Equivalent material emanating from states parties to conflicts is also considered The book is thus an essential reference point for the law and practice of non international armed conflicts *Principles of International Criminal Law* Gerhard Werle, Florian Jeßberger, 2020 Principles of International Criminal Law is one of the leading textbooks in the field of international criminal justice This fourth edition retains the detailed and systematic approach of previous editions whilst adding substantial new material on new theories laws and prosecutions *States and Peoples in Conflict* Michael Stohl, Mark I. Lichbach, Peter Grabosky, 2017-04-07 This volume evaluates the state of the art in conflict studies Original chapters by leading scholars survey theoretical and empirical research on the origins processes patterns and consequences of most forms and contexts of political conflict protest repression and rebellion Contributors examine key pillars of conflict studies including civil war religious conflict ethnic conflict transnational conflict terrorism revolution genocide climate change and several investigations into the role of the state The research questions guiding the text include inquiries into the interactions between the rulers and the ruled authorities and challengers cooperation and conflict accommodation and resistance and the changing context of conflict from the local to the global **International Military Operations in the 21st Century** Per M. Norheim-Martinsen, Tore Nyhamar, 2015-05-08 This book examines the challenges that military forces will face in multinational operations in the 21st century Expanding on Rupert Smith's *The Utility of Force* the volume assesses the changing parameters within which force as a political instrument is ultimately carried out By analysing nine carefully selected mission types the volume presents a comprehensive analysis of key trends and trajectories Building upon this analysis the contributors break the trends and parameters down into real and potential tasks and mission types in order to identify concrete implications for military forces in future multinational operations The context of military intervention in conflicts and crises around the world is rapidly evolving Western powers shrinking ability and desire to intervene makes it pertinent to analyse how the cost of operations can be reduced and how they can be executed more intelligently in the future New challenges to international military operations are arising and this book addresses these challenges by focusing on three key areas of change 1 An increasingly urbanised world 2 The changing nature of missions 3 The commercial availability of new technologies In answering these questions and embracing some of the insights of a growing field of future studies the volume presents an innovative perspective on future international military operations This book will be of much interest to students of international intervention military and strategic studies war and conflict studies security studies and IR in general **Pandemic Polity-Building** Zbigniew Truchlewski, Ioana- Elena Oana, Alexandru D. Moise, Hanspeter Kriesi, 2025-06-05 In 2020 the European Union faced the COVID 19 crisis This book tells the unlikely story of how the European Union survived a crisis that arrived on the heels of a difficult decade during which the EU wrestled with repeated crises from the Euro Area to refugees populism and geopolitics Against all odds a divided polity with a weak centre and low

competences in crucial policy domains managed to overcome powerful disincentives to coordinate its way out of the pandemic and create central capacity building Pandemic Polity Building argues that this puzzling outcome stems from COVID 19 s crisis characteristics and the EU s polity features The relative symmetric nature of the pandemic and the deeply disruptive economic shocks revealed the potential long term externalities of a lack of joint action at the European level The EU coordinated a common vaccine procurement scheme and pooled its fiscal firepower The polity perspective presented here shows how the EU overcame conflicts and managed to coordinate and create new capacity in its centre while relying on a new geography of solidarity within the EU The polity approach allows the authors in this volume to show how the EU did not take a federal path to polity formation Instead it moved towards a polity that serves as an imperfect but solidaristic safety net for its member states The polity approach thus allows this volume to present a firm analytical grasp over the complex crisis politics unleashed on the EU s compound polity This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations
