

A detailed silver chalice is shown in the upper right corner. It features a wide, flared rim with a scalloped edge and a central finial. The body of the chalice is supported by a bearded figure, likely a saint or a personification of a virtue, who is holding the chalice aloft with his right arm. The figure has a full beard and is wearing a robe with a decorative collar. The entire piece is made of highly reflective silver, showing intricate details and highlights.

Treasured Inheritance 600 Years Of Oxford College Silver:

A Treasured Inheritance Helen Clifford, 2004 The silver collections accumulated and preserved in Oxford colleges since the Middle Ages are an important part of England's cultural inheritance As the repository for Oxford University's decorative arts the Ashmolean Museum proudly exhibited an incredible collection of glittering silver and gilt medieval and Tudor silver and **Silver** Helen Hills, 2023-12-21 Silver Transformational Matter presents essays by anthropologists art historians and historians which explore the history of silver incorporating mining trade colonialism and Indigenous expertise *Concepts of Value in European Material Culture, 1500-1900* Bert De Munck, Dries Lyna, 2016-03-09 In contemporary society it would seem self evident that people allow the market to determine the values of products and services For everything from a loaf of bread to a work of art to a simple haircut value is expressed in monetary terms and seen as determined primarily by the objective interplay between supply and demand Yet this price mechanism is itself embedded in conventions and frames of reference which differed according to time place and product type Moreover the dominance of the conventions of utility maximising and calculative homo economicus is a relatively new phenomenon and one which directly correlates to the steady advent of capitalism in early modern Europe This volume brings together scholars with expertise in a variety of related fields including economic history the history of consumption and material culture art history and the history of collecting to explore changing concepts of value from the early modern period to the nineteenth century and present a new view on the advent of modern economic practices Jointly they fundamentally challenge traditional historical narratives about the rise of our contemporary market economy and consumer society **The Culture of Food in England, 1200-1500 C. M.** Woolgar, 2016-04-26 In this revelatory work of social history C M Woolgar shows that food in late medieval England was far more complex varied and more culturally significant than we imagine today Drawing on a vast range of sources he charts how emerging technologies as well as an influx of new flavors and trends from abroad had an impact on eating habits across the social spectrum From the pauper's bowl to elite tables from early fad diets to the perceived moral superiority of certain foods and from regional folk remedies to luxuries such as lampreys Woolgar illuminates desire necessity daily rituals and pleasure across four centuries *Silver* Philippa Merriman, 2009 The curious course of silver through human history unfolds in this rich and engaging book accompanied by striking illustrations from the British Museum From the practical aspects of working silver to its role in magic myth and ritual in cultures as disparate as the Vikings and the Bedouins of North Africa this exquisite book offers a full and fitting reflection of this precious metal's power to move us **Enlightened Oxford** Nigel Aston, 2023 Enlightened Oxford takes a fresh look at the eighteenth century University of Oxford and its relation to the state society and religion of the time and how a long established institution managed to navigate the multiple political challenges of the era while maintaining a cultural presence and a surprising capacity for adaptability **Domestic Institutional Interiors in Early Modern Europe** Sandra Cavallo, 2017-07-05 The early modern period saw the proliferation

of religious public and charitable institutions and the emergence of new educational structures By bringing together two areas of inquiry that have so far been seen as distinct the study of institutions and that of the house and domesticity this collection provides new insights into the domestic experience of men women and children who lived in non family arrangements while also expanding and problematizing the notion of domestic interior Through specific case studies contributors reassess the validity of the categories domestic and institutional and of the oppositions private public communal individual religious profane applied to institutional spaces and objects They consider how rituals interior decorations furnishings and images were transferred from the domestic to the institutional interior and vice versa but also the creative ways in which the residents participated in the formation of their living settings A variety of secular and religious institutions are considered hospitals asylums and orphanages convents colleges public palaces of the ducal and papal court The interest and novelty of this collection resides in both its subject matter and its interdisciplinary and Europe wide dimension The theme is addressed from the perspective of art history architectural history and social gender and cultural history Chapters deal with Italy Britain the Netherlands Flanders and Portugal and with both Protestant and Catholic settings The wide range of evidence employed by contributors includes sources such as graffiti lottery tickets or garland pictures that have rarely if ever been considered by historians

"Seditious Sectaries" Larry J. Kreitzer, 2008-12-01 This book offers the first in depth study of the origins of the Baptist Church in Oxford in the seventeenth century it charts the people the places and the events that helped forge the Baptists into a dissenting congregation over a fifty year period 1641 1691 It chronicles the rise of Baptist conventiclers during the early days of the Civil War when Parliamentarians clashed with Royalist interests in the city of Oxford It proceeds to discuss the significance of the Dissenters during the years of the Commonwealth and Protectorate and the struggle they faced during the Restoration period as a resurgent Church of England sought to stamp its authority on all such seditious sectaries The story is told of a committed group of religious Dissenters made up mainly of local townspeople who were fully integrated into the civic life of Oxford seeking to make their vision of God s kingdom a reality in the world in which they lived An influential tanner a dedicated glover a disaffected and outcast soldier a well connected cider maker and a controversial haberdasher who went on to become Mayor of Oxford all make their appearance here Although the study is essentially biographical in nature it drives the reader back inexorably to primary source materials many of them identified and discussed here for the first time

'A Marvel to Behold' Timothy Schroder, 2020 Bringing the existence and significance of the lost riches of Henry VIII back to life this book sheds new light on Henrician and Tudor court culture Henry VIII amassed the most spectacular collection of gold and silver of any British monarch Plate and jewels were hugely prominent in medieval and Renaissance courts and played an essential role in dynastic marriages and diplomacy as well as in cementing the bonds between king and court Ranging from plain domestic wares to extraordinary bejewelled works of art Henry s collection embraced virtuoso continental objects as well as vast quantities of plate commissioned from London

goldsmiths or inherited from his father But nearly all of these holdings were destroyed over the following century and of the thousands that he owned no more than a handful have survived to modern times This book makes use of the wealth of surviving documentation inventories drawings lists of payments dispatches by foreign ambassadors and other records to explore this lost collection and the light it sheds on the monarchy Starting with an assessment of the young king s inheritance from his father the book considers the role of plate at state banquets in great church services and in the regular exchange of gifts between courtiers and ambassadors the role of plate and jewels as a potent symbol of power how the king used confiscation as an instrument of humiliation of those who fell from grace including Cardinal Wolsey and Katherine of Aragon and how Henry s avaricious seizure of church plate towards the end of his life throws light on his changing character While the focus is on plate and goldsmiths work the context ranges from court ceremonial to rivalry between princes the role of the church the vulnerability of persons and institutions with covetable assets and relations between the king and his own family Bringing the existence and significance of these lost riches back to life the book sheds new light on Henrician and Tudor court culture

Reinventing the Economic History of Industrialisation Kristine Bruland, Anne Gerritsen, Pat Hudson, Giorgio Riello, 2020-03-26 The Industrial Revolution is central to the teaching of economic history It has also been key to historical research on the commercial expansion of Western Europe the rise of factories coal and iron production the proletarianization of labour and the birth and worldwide spread of industrial capitalism However perspectives on the Industrial Revolution have changed significantly in recent years The interdisciplinary approach of *Reinventing the Economic History of Industrialisation* with contributions on the history of consumption material culture and cultural histories of science and technology offers a more global perspective arguing for an interpretation of the industrial revolution based on global interactions that made technological innovation and the spread of knowledge possible Through this new lens it becomes clear that industrialising processes started earlier and lasted longer than previously understood Reflecting on the major topics of concern for economic historians over the past generation *Reinventing the Economic History of Industrialisation* brings this area of study up to date and points the way forward
