lines will count as two or more lines.)

The spark plugs and valves should be maintained in good condition and free of dirt and oil.

DISCUSSION: To find the distribution, grade engine until No. 1 piston is approaching top center on its compression stroke and then center shaft appears in center of inspection window on bottom of clock housing.

The compressive stroke of No. 1 piston can be determined by removing the spark plug and placing thumb in spark plug hole. Crown closely sealed in forward past thrusts. The reverse thrust in forward will be very close the impulsive opening of this time. Very small amount. Disregard the "d" or advance mark.

ADDITIONAL: The assumption indicates the charging or discharging rate of battery. If necessary, should require discharge with lights off, disconnect the battery cable, to prevent the discharge of battery, until the difficulty is located and corrected. Such a condition is usually caused by a worn or frayed wire creating a short circuit or by an actual short circuit being caused internally.

18. whenever fails to show a changing rate one of the following must be the cause:

1. Losses are correlated with connections.
2. Broken wires.
3. Faulty insulation.
4. Only at ground potential because of insulation.
5. Wire connected to ground.

Fluorescent and brushes can be cleaned with
excess "H" solvent. Use hot water when
possible.

LIGHT SWITCH & COILATION CONTROL. - The generator has two changing rates. These are controlled by the field switch.

When the light switch is pushed all the way up, the lights are off and the charging rate is about 5 amperes. When the switch is pulled out to first touch the lights are on and the charging rate remains about 5 amperes. When the light switch is pulled all the way out the lights are off and the charging rate is increased to about 10 to 12 amperes. The light rate of charge should only be used when the battery is in a partially discharged condition. In most tractor operations the level will be in a continuous low battery.

FLUX - The light flux is provided with a 20 degree lens. This lens is located on the inside of the instrument box.

LIGHTS - The head lights are adjustable in or out and may be adjusted up or down, by loosening the retaining thumb screw and rotating the lights to the desired position.
