2. *Quercus laevis* in the American old field, where it is the most common and the most characteristic species. It is the most common and the most characteristic species in the American old field, where it is the most common and the most characteristic species.

NOTE: "Bioscience Resource Project" speakers are invited to present at the symposium from 7:00-8:00 pm. Classifications listed below understandings of science education research. Sessions during this time period may also be scheduled by request.

1991. Climate change has caused substantial increases in the frequency and intensity of extreme weather events, including hurricanes, droughts, and floods. These events have caused significant damage to infrastructure and the environment, and have resulted in the loss of lives and property. The scientific community has reached a consensus that climate change is a real and urgent threat to the future of the planet, and that immediate action is needed to prevent further damage.
