Walking Through The Jungle Music Lesson:

Teaching Across the Early Years 3-7 Hilary Cooper, Chris Sixsmith, 2004-11-23 This practical and accessible book explores ways of developing continuity and coherence in children's learning from three to seven years old. It is based around three case studies in which tutors on Initial Teacher Training courses worked with early years practitioners in three different pre-school settings, each linked to a primary school. The book describes how they successfully managed to plan and teach integrated themes across the age range in the context of the requirements of the Foundation Stage and the National Curriculum. Each case study has a different focus: science, design and technology, the arts, including an ICT strand, the humanities, including a physical education strand. English and mathematics dimensions run through each theme. The book is alive with discussion of children's art, language, drama, and music, captured as field notes, writing, drawing, and as video tape. Each chapter concludes with suggestions of ways in which readers can develop the ideas in their own contexts. This book will be invaluable reading for students on Early Years courses, Early Years practitioners and tutors and mentors in early childhood education.

Making Theater Herbert R. Kohl, 1988 Herbert Kohl shows how to explore improvisation with young people and to use dialogue and monologue to help students begin to write their own plays and adapt plays and stories for performance. He provides wonderful descriptions of adapting *Alice in Wonderland*, *Hamlet*, *Antigone* and other great works.

Creativity and the Arts with Young Children Rebecca T. Isbell, Shirley C. Raines, 2007 *Creativity and the Arts with Young Children 2e* is written specifically for early childhood educators as well as professionals who work with children birth through age eight. The focus of this book, now in its second edition, is on making the vital connection to music, movement, drama, and the visual arts in all areas of the classroom, as well as developing creative teachers and professionals who will be able to foster an artistic environment. The book includes observations and pictures of teachers and children that demonstrate practical ways the arts can be used to help children reach their potential. There are expanded sections on multi-intelligences, Reggio Emilia, divergent questioning, and art recipes, and the book also includes literacy connections and activities for adults at the end of each chapter. There are many ideas in the book for open-ended activities that are important for the development of young children and will encourage them to think in new ways. The standards and recommendations from professional

organizations are addressed so that the reader can recognize what goals these organizations believe are important in the early years. Thorough in its coverage, the text speaks to children with special needs and cultural diversity, leaving the reader with the most complete information regarding arts in the young child's learning environment. *Physical Education for the Elementary Schools of Colorado*, Colorado.
