Transatlantic Relations Since 1945 An Introduction:

Transatlantic Relations since 1945 Jussi Hanhimäki, Barbara Zanchetta, Benedikt Schoenborn, 2012-03-15

Transatlantic Relations Since 1945 offers a comprehensive account of transatlantic relations in the second half of the 20th century extending to the present day. The transatlantic relationship has been the bedrock of international relations since the end of World War II. This new textbook will focus on the period since the defeat of Nazi Germany when the multitude of links between United States and Western Europe were created, extended and multiplied. Written in an accessible style, it emphasizes transatlantic interactions and avoids the temptation to focus on either U.S. domination or European attempts to resist an American effort to subjugate the old continent. That influence has travelled across the Atlantic in both directions is one of the starting points of this text. Structured chronologically, the book will be built around three key themes: Security, From the Cold War to the War on Terror, Economics, Integration and Competition, Soft power and Transatlantic Relations. This book will be of great interest to students of transatlantic relations, NATO, U.S. Foreign Policy, Cold War History, European History and IR, International history.

Transgressing Boundaries Marija Wakounig, Markus Peter Beham, 2013. Since the 1970s, the Centers for Austrian Studies, which were founded by the Austrian Federal Ministry for Science and Research, have played an important role for the Austrian and international scientific community. Their tasks are to promote studies on Austria and Central Europe through their host nations as well as to give Austrian students the possibility to conduct research abroad and to get in touch with the local scientific community. This volume contains reports on the activities of these institutions in the academic year 2012/2013 as well as working papers of some of their most promising PhD students. Their research, presented in the book, covers various aspects of Central European history in modern times, ranging from the 17th century to the present. Series Europa Orientalis Vol 14.

The Trilateral Commission and Global Governance Dino Knudsen, 2016-05-12. This book provides the first analysis of the Trilateral Commission and its role in global governance and contemporary diplomacy. In 1973, David Rockefeller and Zbigniew Brzezinski founded the Trilateral Commission, involving highly influential people from business and politics in the US, Western Europe and Japan. The Commission was soon perceived as constituting an embryonic or even shadow world government. As the first researcher to have accessed the Commission's archives, the author argues that this study demonstrates that global governance and international diplomacy should be considered a product of overlapping elite networks that merge informal and formal spheres across national borders. This work has three immediate aims: to trace the background, origins, purposes, characteristics and modus operandi of the Commission; to investigate the elite aspect of the Commission and how this related to democracy; and to demonstrate how the Commission contributed to diplomatic practices and policy formulation at national and international levels. The overall purpose of this book is to evaluate the significance of the Trilateral Commission with particular focus on the implications of its activities on the way we understand decision-making processes and diplomacy in modern democratic societies. This book

will be of much interest to students of the Cold War US foreign policy diplomacy studies and IR in general
