Transformations Of Consciousness Conventional And Contemplative Perspectives On Development New Science Library:

Transformations of Consciousness Ken Wilber, Jack Engler, Daniel P. Brown, 1986 Drawing on modern psychology and psychiatry as well as the world's great meditative traditions this book presents the first full spectrum model of human development one that includes both the conventional stages of psychological growth and the higher levels of spiritual development

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

Socially Constructing Communication Gloria J. Galanes, Wendy Leeds-Hurwitz, 2009 The idea for this book originated at NCA's Summer Institute Catching Ourselves in the Act A Collaborative Planning Session to Enrich our Discipline through Social Constructionist Approaches The conference provided the opportunity to interact with like minded others to discuss how social construction approaches influence or should influence our work Another goal for the conference and for this book is to promote social construction approaches within the discipline We need to look forward by focusing on how the social construction perspective transforms our own work When we teach how can we best clarify the social construction principles we believe in and how can we convey the passion we feel for this approach How can we insure that our research practices are faithful to constructionist principles What practices can we or must we adopt to remain faithful to these principles Together the chapters in this volume address such questions with the intention of helping us take the next step forward This book extends the conversation about social constructionism approaches and invites others to participate in that conversation
