Nanotechnology and Nanophotonics Werner J. Blau, David Kennedy, John Colreavy, 2005 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their

respective fields Proceedings of SPIE are among the most cited references in patent literature *Frontiers in Surface Nanophotonics* David L. Andrews,Zeno Gaburro,2007-08-23 This book explores the role of surface effects in optical phenomena in nanoscience from two different perspectives When systems are reduced in volume the ratio of surface versus volume increases At the level of single nanostructures this translates into an enhanced role of interfacial chemistry and thermodynamics At the level of systems of nanostructures it translates into larger density on interfaces which in turn leads to such intriguing collective effects as plasmonics or multiple reflection and refraction phenomena The book highlights both perspectives presenting sample applications Without claiming to be exhaustive the book aims to stimulate readers in this potentially rewarding field
