Education for Practice in a Hybrid Space Franziska Trede, Lina Markauskaite, Celina McEwen, Susie Macfarlane, 2019-05-17 This book presents a mobile technology capacity building framework that offers academics students and practitioners involved in workplace education a deeper understanding of and practical guidance on how mobile technology can enhance professional learning Approaching professional and workplace learning as a hybrid space in which work learning and technology meet the book discusses the value of mobile technology in shaping professional education particularly during student placements The framework focuses on staying professional and safe considering issues of time and place planning learning activities initiating dialogue networking creating learning opportunities on the go and deepening reflection It is designed to assist students and their educators to use mobile technology knowledgeably and responsibly and to help bridge the gap between university learning and workplace practice This book also contributes to a better understanding of the interconnectedness between learning practice and technology It demonstrates how to enhance learning and working with mobile technology by drawing on two perspectives the professional plus and the deliberate professional

The Official Guide of the Railways and Steam Navigation Lines of the United States, Porto Rico, Canada, Mexico and Cuba, 1901 **Public Examinations Examined** Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book's primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those

concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog

Angela W Little Professor Emerita Institute of Education University College London This book is very well structured and written and draws on the authors remarkable global knowledge across countries and histories It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings

Mark Bray UNESCO Chair Professor of Comparative Education University of Hong Kong and former Director UNESCO International Institute for Educational Planning I am sure that *Public Examinations Examined* which thoroughly analyzes the practice of public examinations in different countries and makes profound and well grounded conclusions will arouse very great interest and will serve to further improve public examinations

Cooperative and Work-Integrated Education in Asia Yasushi Tanaka, Karsten Zegwaard, 2018-09-28 It has been over a century since Cooperative System of Education a work study programme for higher education was initiated by Herman Schneider at University of Cincinnati in the United States Today it is known as Cooperative Education which is commonly included within the umbrella term of Work Integrated Learning and broadly referred to by the World Association of Cooperative Education WACE as Cooperative and Work Integrated Education CWIE Its development worldwide has been closely related to the socioeconomic background of the region This book offers the first attempt to focus on the development of CWIE in Asia To date the development of CWIE in the Asia region has been slow compared to their counterparts The analysis follows international comparisons of China Japan Korea Hong Kong Vietnam Thailand Malaysia and Singapore on

their educational history vocational education CWIE and future issues Although the level of development varies among them there is no doubt that this region as a whole is experiencing a rapidly growing global demographic and economic prominence CWIE can and to some extent already does play an important supportive role as part of growth The book goes on to conclude that in order to enable further successful expansion of CWIE and improve its best practice it is imperative to establish national and regional associations for CWIE as well as establish collaborative research activities across the region with governmental funding support

Remote Sensing of Hydrometeorological Hazards George P. Petropoulos, Tanvir Islam, 2017-11-02 Extreme weather and climate change aggravate the frequency and magnitude of disasters Facing atypical and more severe events existing early warning and response systems become inadequate both in scale and scope Earth Observation EO provides today information at global regional and even basin scales related to agrometeorological hazards This book focuses on drought flood frost landslides and storms cyclones and covers different applications of EO data used from prediction to mapping damages as well as recovery for each category It explains the added value of EO technology in comparison with conventional techniques applied today through many case studies

The Cities of the Plain Robin Rönnlund, 2023-09-30 This book explores urbanism in Antiquity from an archaeological perspective focusing on the area of western Thessaly in central Greece Presenting all the available evidence for ancient urban sites in the region the study outlines and discusses the origins development and decline of urbanism in the area The archaeological evidence shows that urban sites in western Thessaly developed from the mid 4th century BCE with at least 25 identified contemporaneous cities spread over the area These cities appear to have been planned and organised from the onset with regular street grids fortification systems and water supply works but were generally short lived typically existing for only five six generations Most of the sites were completely or nearly completely abandoned as settlements in the early 2nd century BCE often with evidence of violent destruction and only a handful survived as smaller regional centres under the Roman administration Restorations of the former urban sites and especially their fortifications occur towards the end of Antiquity especially the first half of the 6th century CE but re occupation appears again to have been short lived as only three cities survived into the Middle Ages From a regional perspective the study shows that the rise and fall of urbanism itself did not necessarily cause complete socio political disruption but rather reflect changes in regional and supra regional political organisation On a global scale the study exemplifies the political nature of the pre Industrial city its synthetic rather than organic role in agrarian societies and the cyclic nature of urbanity in history The book contains an extensive catalogue presenting each site with photographs topographical sketches and complete bibliography

Jesus Before Constantine Doug E. Taylor, 2020-08-12 That's now but what about then There is much diversity in Christianity today in terms of what constitutes necessary core beliefs but what can we know about the earliest Christianity Until the major councils began in the fourth century were all who claimed to be Christian considered part of the church or was there more to it than just claiming a name Is there evidence for how the church understood core and necessary beliefs prior to Constantine's arrival in history and the Council of Nicea in AD 325 This book examines such questions Using only those materials that are accepted by most scholars on the subject whether they are Christian or not and focusing on the period from AD 30 250 a picture emerges showing what Christians held as a core belief as well as how flexible they were on this belief Only after identifying where the church stood in this period can we begin to understand whether others such as Ebionites Docetists and Marcionites would have been accepted as Christian A case is made based on writings from the church the Nag Hammadi and a completely secular tool from the twentieth century to find the conclusion to this question

Slow Onset Disasters Graziano Salvalai, Enrico Quagliarini, Juan Diego Blanco Cadena, Gabriele Bernardini, 2024-02-16 The book provides an overview of the Slow Onset Disasters SLOD in the urban built environment discussing potential strategies to assess and mitigate multiple climate change related risks Climate change evidence has been reported in the last decades suggesting that the anthropogenic activities are accelerating these changes towards a warmer and more polluted environment In this context SLODs have been linked to climate change related disasters and have been stated to have a higher impact risk within dense built environment BE Therefore the book presents a description of the most relevant SLODs their significance and confluence the way in which scientists and entities are monitoring their progression at different scales a structured risk assessment strategy and the deconstruction of the BE characteristics that make it more prone to SLODs risk In addition it highlights the necessity of adapting the traditional risk assessment methods to account for different vulnerability types including the morphology and materiality of the BE and the BE users characteristics In fact individual

features influence users responses and tolerance to environmental stressors because of age health gender habits and behaviour thus impacting the users vulnerability Exposure can then amplify these issues since it defines the number of users that can be effectively affected by the SLOD Starting from this perspective the book first traces literature based correlations between individual features use behaviour and individual response to the SLOD altered open spaces Then a novel methodology to quantify the variations of users vulnerability and exposure is offered to support designers in quickly defining input scenarios for risk assessment and mitigation Lastly it demonstrates through a case study the SLOD risk assessment framework proposed and the evaluation of the efficacy of risk mitigation strategies
