impression of the life of an SS stormtrooper in the frontline during Hitler's crusade against communism Jacket **The Spanish Blue Division on the Eastern Front, 1941-1945** Xosé M. Núñez Seixas, 2022-03-31 In 1941 the Franco regime established the Spanish Division of Volunteers to take part in the Russian campaign as a unit integrated into the German Wehrmacht Recruited by both the Fascist Party Falange and the Spanish army around 47 000 Spanish volunteers joined what would become known as the Blue Division The Spanish Blue Division on the Eastern Front 1941 1945 explores an intimate history of the Blue Division from below using personal war diaries letters and memoirs as well as official documents from military archives in Spain Germany Britain and Russia In addition to describing the Spanish experience on the Eastern Front Xos M N ez Seixas takes on controversial topics including the Blue Division's proximity to the Holocaust and how members of the Blue Division have been remembered and commemorated Addressing issues such as the behaviour of the Spaniards as occupiers their perception by the Russians their witnessing of the Holocaust their commitment to the war aims of Nazi Germany and their narratives on the war after 1945 this book illuminates the experience of Spanish combatants and occupied civilians **German Tank Destroyers** Pierre Tiquet, 2021-08-04 An unusually well detailed pictorial history of the entire class of vehicles including the Hornisse Jagdpanzer 38 Jagdpanzer IV and Elefant AMPS From the early days of World War II it was clear that the Wehrmacht's antitank units would need to be motorized as existing horse or automobile drawn units were too slow to be effective Initially antitank guns were mounted onto available usually obsolete tank chassis such as the Panzerjäger I and II However German engineers would soon turn to the heavy chassis of the Panzer IV the Panther and the Tiger for their tank hunters It became apparent during the invasion of France that enemy antitank guns were both more powerful and better armored and improvement became a priority during Barbarossa as German units faced off against the new Soviet tanks The appearance of the Soviet T 34 in July 1941 meant that the Germans had to quickly come up with something equally powerful The result was the motorized panzerjäger faster and more mobile than older towed versions This was followed in 1942 by the introduction of the 7 5cm gun Further designs and modifications were informed by reports from the front line Some of these conversions were very successful and resulted in fearsome tank destroyers deployed to great effect by the Wehrmacht The lightweight Hetzer for example was based on a modified Panzer 38 t and entered service in 1944 This small tank became Germany's main tank destroyer during the final stages of the war and would continue in use around the world even after 1945 Though they may not have looked that intimidating the Landser were soon won over and were comforted to have something reliable to stand between them and the Soviet tanks This account illustrated by hundreds of period photos examines the development and deployment of various models of tank destroyers during World War II A very nice reference resource with lots of detail and diorama inspiration for modelers Military Model Scene
