Born to Walk Dan Rubinstein, 2015-04-01 The case for getting back on our feet The humble act of putting one foot in front of the other transcends age geography culture and class and is one of the most economical and environmentally responsible modes of transit Yet with our modern fixation on speed this healthy pedestrian activity has been largely left behind At a personal and professional crossroads writer editor and obsessive walker Dan Rubinstein travelled throughout the U S U K and Canada to walk with people who saw the act not only as a form of transportation and recreation but also as a path to a better world There are no magic bullet solutions to modern epidemics like obesity anxiety alienation and climate change But what if there is a simple way to take a step in the right direction Combining fascinating reportage eye opening research and Rubinstein's own discoveries Born to Walk explores how far this ancient habit can take us how much repair is

within range and guarantees that you'll never again take walking for granted Anne Brigman Kathleen Pyne, 2020-06-23

The life and work of an essential photographer whose feminism and pictorialist images distanced her from the mainstream. In the first book devoted to Anne Brigman 1869-1950, Kathleen Pyne traces the groundbreaking photographer's life from Hawaii to the Sierra and elsewhere in California, revealing how her photographs emerged from her experience of local place and cultural politics. Brigman's work caught the eye of the well-known photographer Alfred Stieglitz, who welcomed her as one of the original members of his Photo Secession group. He promoted her work as exemplary of his modernism and praised her Sierra landscapes with female nudes, work that at the time separated Brigman from the spiritualized upper-class femininity of other women photographers. Stieglitz later drew on Brigman's images of the expressive female body in shaping the public persona of Georgia O'Keeffe into his ideal woman artist. This nuanced account reasserts Brigman's place among photography's most important early advocates and provides new insight into the gender and racialist dynamics of the early twentieth-century art world, especially on the West Coast of the United States Creativity Stan Lai, 2025-11-04

Asia's legendary playwright-director Stan Lai has written one of the unique works of our time, explaining that the mysterious act of creativity is actually a traceable function of mind, and there is a path to learn creativity through unlearning many of our habits picked up in life. His special map, as well as tailor-made exercises, lays out an awe-inspiring yet practical guide from a lifetime of creative work, revered in Asia by artists and business leaders alike. Through his extensive experience, the greatest living Asian playwright shows us how to cultivate a creative app that works within us. Matthieu Ricard says Stan Lai teaches us how to see and how to do. Praised by Jack Ma, Ang Lee, and other luminaries, this book is a rewrite by the author of his book that is the most prominent work on creativity in China, having sold over 700,000 copies. Robert Wilson calls the work foundational support for arts and culture. Stan Lai is uniquely qualified to write on creativity because he not only has four decades of creative experience, widely acclaimed as the greatest playwright in the Chinese language, but is also a dedicated educator. Shannon Jackson calls the work a must-read from an internationally renowned artist. Can creativity be taught? Most of the books and training in this area deal with skills for jumpstarting alternative thinking, brainstorming, and other exercises, but do not deal with creativity itself. They don't tackle the obvious question: What is creativity, and how can I get it? As one of the world's leading artists, Lai explains that the reason we don't think creativity can be taught is that we don't really understand what happens in the mysterious process. By slowing down the moment of inspiration, Lai lets us see exactly the elements involved in this complex process that lasts only an instant. Then he shows you how to prepare for this moment through his unique Map of Creativity. This is a whole path of training in creativity, which he explains clearly and with humor and compassion, and tailor-made exercises. Travis Preston says Stan Lai guides us to the center of the creative moment and the ultimate unity of the spiritual and physical worlds. Creativity is a milestone in understanding and learning the creative act. Born in America, raised in Taiwan, with a career spanning the Chinese diaspora, Lai believes that we are all born creative, but the source to

creativity has been blocked by life How to take down the barriers that are blocking the source from us is a task of un learning many things that have become habits and put us into a so called non creative mode Taking his cue from his Buddhist training that wisdom and method are both needed for success in any endeavour he explains how wisdom has mysteriously vanished from education systems all over Most teaching in creativity focuses on method which one learns in one s art But we need another type of training more urgently the training for wisdom which can only happen in the domain of life To do you must first be To discover your creativity you must first discover yourself Octavian Saiu says This book is not a manual but a statement of belief an enduring message about how each of us can go beyond our limits
