What Is Science Donald J DeGracia:

What is Science? Donald J. DeGracia, 2014-05-23 In spite of the amazing technological marvels of the modern world that have stemmed from science there is no agreed upon definition of what science is In this lively colorful and engaging work Don DeGracia contends that science is a very weak form of what has been described for thousands of years in Hindu India as samadhi Samadhi is an advanced technique of Raja Yoga in which the meditating subject fuses with the object of meditation in a process that has been called knowing by being By understanding science as a weak form of samadhi and comparing it to the knowledge acquired from yogic practices many of the limitations of science are brought to the fore These include the link between mind and body the role of the senses as middle men between the mind and the objects of perception why mathematics is unreasonably effective for describing the physical world and how and why power is unlocked by the human mind when correct knowledge is obtained **The Yogic View of Consciousness (HQ)** Donald J. DeGracia, 2015-11-21

Patanjali's Yoga Sutras are mysterious and cryptic and exert hypnotic fascination on all whose minds they touch In *The Yogic View of Consciousness* Don DeGracia unfolds the theory of consciousness enshrined in the obtuse aphorisms of the Yoga Sutras Yoga describes the mind as a multi leveled system closed in on itself yet illuminated from within its innermost depth by a divine spark that gives life and consciousness to every individual Drawing on ideas Eastern and Western ancient and modern from Abhinavagupta to Leibniz Mahaprabhu to George Berkeley IK Taimni to Hermann Weyl DeGracia weaves an intellectual tapestry harmonizing science philosophy religion mathematics and the mystical Compared to the grandeur of *The Yogic View of Consciousness* the hostilities of secular science and philosophy appear as little more than the psycho babble of lunatics and an affront to the sublime majesty of existence Take the wild ride to the very source of being revealed by *The Yogic View of Consciousness* **PlaneTalk Collected Writings 2013-2014** Donald J. DeGracia, 2014-11-10 Fair warning is given to the materialists and physicalists who think we are nothing more than our brain and body DeGracia throws down the gauntlet and offers substantial challenges to such shallow and naive views in this provocative set of essays This collection consists of PlaneTalk blogs from 2013 and 2014 covering a variety of topics about this and the other worlds The M bius geometry that lets us move amongst the planes is discussed as are the ten types of samadhi described by Patanjali in the Yoga Sutras Read about Wilder Penfield the dualist neurosurgeon and what he says about where consciousness begins and ends in the brain A Toy Model of Epistemology is developed based on Chaitin's ideas in algorithmic information theory Leibniz monads and Richard Feynman's philosophies are discussed and so much more There's bound to be something here for everyone interested in the links between our physical and nonphysical existence **Samadhi** Donald J.

DeGracia, 2015-12-12 Samadhi compiles in one volume the articles written by Donald J DeGracia Ph D about the practical aspects of yoga including the mysterious technique of samadhi Samadhi is the most important method of Patanjali's Raja Yoga But it is also the most obscure and cryptic aspect of the Yoga Sutras The articles in this volume outline Patanjali's

ashtanga yoga methods describe the ten types of samadhi discuss sabda jnana and artha and present a possible recipe for achieving samadhi Samadhi has no counterpart in our normal everyday life It is the most difficult aspect of yoga practice Mastery of samadhi allows a person voluntary access to any and all possible states of consciousness Along with his scientific knowledge DeGracia s experiences with altered states of consciousness provide a basis to discuss the inner workings of the yoga methods that goes beyond mere intellectual speculation *Experience* Donald J. DeGracia,2014-09-25 With his usual blending of Western and Eastern thought Don DeGracia considers the ancient question of the nature of our experience Unlike most accounts this one begins with the fact of altered states of consciousness The curtain is pulled back to reveal the infinity of dynamic patterns found under the surface mind the desires the unfulfilled urges longings and striving Under these are the mindless urges of life and the cosmos One and all they are but futile striving to become what they never can be the infinite The mask of reality is ripped asunder to show that all existence is but mirage an endless futile striving towards a goal that can never be realized It is always darkest before the sunrise Similarly the phantasmagoria of our seeming is ultimately a message of hope By peering into the infinite depths of the irrationality of appearances we unlock the door to approach the Ultimate Reality behind all appearances This is the message of Experience **Neuroprotective Therapy for Stroke and Ischemic Disease** Paul A. Lapchak,John H. Zhang,2017-01-12 A critical and comprehensive look at current state of the art scientific and translational research being conducted internationally in academia and industry to address new ways to provide effective treatment to victims of ischemic and hemorrhagic stroke and other ischemic diseases Currently stroke can be successfully treated through the administration of a thrombolytic but the therapeutic window is short and many patients are not able to receive treatment Only about 30% of patients are cured by available treatments In 5 sections the proposed volume will explore historical and novel neuroprotection mechanisms and targets new and combination therapies as well as clinical trial design for some of the recent bench side research **Individual Differences in Conscious Experience** Robert G. Kunzendorf,Benjamin Wallace,2000 Individual Differences in Conscious Experience is intended for readers with philosophical psychological or clinical interests in subjective experience It addresses some difficult but important issues in the study of consciousness subconsciousness and self consciousness The book s fourteen chapters are written by renowned pioneering researchers who collectively have published more than fifty books and more than one thousand journal articles The editors introductory chapter frames the book s subtext that mind brain theories embodying the constraints of individual differences in subjective experience should be given greater credence than nomothetic theories ignoring those constraints The next five chapters describe research and theory pertaining to individual differences in conscious sensations specifically individual differences in pain perception phantom limbs gustatory sensations and mental imagery Then two succeeding chapters focus on individual differences in subconsciousness The final six chapters address individual differences in altered states of self consciousness dreams hypnotic phenomena and various clinical syndromes Series B Handbook of

Narratology Peter Hühn, Jan Christoph Meister, John Pier, Wolf Schmid, 2014-10-10 This handbook provides a systematic overview of the present state of international research in narratology and is now available in a second completely revised and expanded edition Detailed individual studies by internationally renowned narratologists elucidate central terms of narratology present a critical account of the major research positions and their historical development and indicate directions for future research
