Handbook of Cellular Manufacturing Systems Shahruckh A. Irani,1999-04-15 Cellular manufacturing CM is the grouping of similar products for manufacture in discrete multi machine cells It has been proven to yield faster production cycles lower in process inventory levels and enhanced product quality Pioneered on a large scale by Russian British and German manufacturers interest in CM methods has grown steadily over the past decade However there continues to be a dearth of practical guides for industrial engineers and production managers interested in implementing CM techniques in their plants Bringing together contributions by an international team of CM experts the Handbook of Cellular Manufacturing Systems bridges this gap in the engineering literature

Procedural and declarative information in software manuals Nicole Ummelen,2022-05-20 People who use software manuals want to get something done Procedural information directly supports this goal but the use of declarative information in manuals has often been under discussion Current research gives rise to the expectation that manual users tend to skip declarative information most of the time Also no effects of declarative information in software manuals have yet been found In this study information use and information effects in software manuals are investigated in three experiments thereby taking different user types different task types and different information arrangements into account A new technique was applied the click read method This technique enables the software user to use the manual and carry out software tasks at the same time while information selection and times are recorded automatically in logfiles For the first time quantitative data are presented about the amounts of procedural and declarative information that were selected and the times that were spent using these information types Although procedural information is selected more often and used longer declarative information appears to be a substantial part of the information selection Moreover the results show that using declarative information positively affects performance on future tasks performance on reasoning tasks and factual knowledge
