Saunders,Paul Trowler,Veronica Bamber,2011-06-01 I congratulate the authors on what I believe will be a very interesting and useful book The language is accessible and the structure of the argument is coherent and consistent This is a very interesting and significant contribution to the field of higher education in general and scholarship in evaluative practices in particular Judyth Sachs Deputy Vice Chancellor and Provost at Macquarie University Sydney Australia With an increasing and arguably troubling confidence in the use of international league tables student surveys and research ratings to evidence the value of higher education such scrutiny of higher education evaluation practices has never been more timely I believe the book may contribute most in empowering evaluators themselves to ensure that the outcomes of evaluation can be used to inform strategic priorities and decisionmaking in more meaningful ways Higher Education Review Vol 44 No 1 October 2011 A considerable amount of time and effort is invested in attempts to control change and improve the higher education sector These attempts involve evaluative practice but we have not yet conceptualised the evaluations that take place so therefore the opportunity to understand the value and nature of different types of intervention is frequently missed This book seeks to dismantle traditional boundaries in approaches to evaluation assessing how value and worth is attributed to activities in higher education It looks at evaluative practice in Higher Education rather than the evaluation of Higher Education Reconceptualising Evaluation in Higher Education aims to aid understanding drawing on a set of evaluative practices from the UK and internationally The book will be of value and relevance to higher education providers and policy makers within higher education Contributors Veronica Bamber Margo Blythman Val Chapman Bernadette Charlier Rob Cuthbert Harry Hubball Kerri Lee Krause Neil Lent Alan McCluskey Ian McNay Joan Machell John M Owen Marion L Pearson Michael Prosser Christoph Rosenbusch Murray Saunders Uwe Schmidt Alison Shreeve Paul Trowler Massimiliano Vaira Christine Winberg Qualitative Research & Evaluation Methods Michael Quinn Patton,2014-10-29 Drawing on more than 40 years of

experience conducting applied social science research and program evaluation author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods inquiry frameworks and analysis options available today Now offering more balance between applied research and evaluation this Fourth Edition of Qualitative Research more than a hundred new summarizing and synthesizing exhibits and a wide range of new highlight sections sidebars that elaborate on important and emergent issues For the first time full case studies are included to illustrate extended research and evaluation examples In addition each chapter features an extended rumination written in a voice and style more emphatic and engaging than traditional textbook style about a core issue of persistent debate and controversy

Evaluation Management in South Africa and Africa Fanie Cloete, 2014-12-01 This blind peer reviewed book systematically records analyses and assesses for the first time in a single volume the implications of the global development and management of professional evaluation for the African continent The book deals with the most strategic contemporary evaluation themes Each of these themes contains discussions of theoretical issues illustrated with one or more short case studies while selected longer case studies and other relevant documentation are also taken up in annexures at the end of the book The book therefore comprises a guide to best M E practices for purposes of systematic policy programme and project evaluations It is suitable for both professional M E institutionalisation and capacity building projects as well as for evaluation information dissemination and education at different levels in the public private and voluntary sectors in society especially in a developmental context

Objective Measurement Mark Wilson, George Engelhard, 1992 The chapters in this new volume describe original research concerned with both theory and practice in measurement The material originated in presentations made at a conference that brings together practicing professionals and theoreticians in diverse areas of measurement and related fields The first group of papers embody the most important aspect of objective measurement its application to diverse contexts and purposes The examples included concentrate on two types of situations performance assessment and criterion referenced testing The specific contexts range from writing assessment to assessment of the professional development of teachers to high school physics The second group of papers are focused on an area of great importance in assessment today the modeling of raters and judges in an assessment context The

volume concludes with papers that explore the domain of theory in measurement characterized by an innovative approach to model building. Even though they are categorized as theory papers, most are based on the complicated and interesting problems that arise in quite specific contexts. As such, they represent some of the most original and exciting developments in the field of measurement today, ranging from multidimensional measurement to graph theory and clustering techniques. This volume presents original research concerned with the practice of measurement and the theory of measurement. The words in the title, objective measurement, indicate that the chapters are all related to a particular approach to the philosophy and practice of measurement. By objective measurement, we mean that in a situation where a certain class of stimuli, for example, items are used to measure certain individuals. The chapters in this book originated in presentations made at the International Objective Measurement Workshop (IOMW) devoted to exploring the interface between theory and practice in measurement. Based on the complicated and interesting problems that arise in quite specific contexts, they represent some of the most original and exciting developments in the field of measurement today.
