Becoming Nonviolent Peacemakers Eli Sasaran
 McCarthy, 2012-07-11 Why do many U S residents Catholics and Catholic leaders among them too often fall short of adequately challenging the use of violence in U S policy The opportunities and developments in approaches to peacemaking have been growing at a significant rate However violent methods continue to hold significant sway in U S policy and society as the commonly assumed way to peace Even when community organizers policymakers members of Catholic leadership and academics sincerely search for alternatives to violence they too often think about nonviolence as primarily a rule or a strategy Catholic Social Teaching has been moving toward transcending the limits of these approaches but it still has significant room for growth In order to contribute to this growth and to impact U S policy McCarthy draws on Jesus Gandhi Ghaffar Khan and King to offer a virtue based approach to nonviolent peacemaking with a corresponding set of core practices This approach is also set in conversation with aspects of human rights discourse to increase its possible impact on U S policy As a whole *Becoming Nonviolent Peacemakers* offers an important challenge to contemporary accounts of peacemaking in the U S

The Routledge Handbook of Social Change Richard Ballard, Clive Barnett, 2022-09-30 The Routledge Handbook of Social Change provides an interdisciplinary primer to the intellectual approaches that hold the key to understanding the complexity of social change in the twenty first century We live in a world of intense social transformation economic uncertainty cultural innovations and political turmoil Established understandings of issues of well being development democratisation progress and sustainability are being rethought both in academic scholarship and through everyday practice organisation and mobilisation The contributors to this handbook provide state of the art introductions to current thinking on central conceptual and methodological approaches to the analysis of the transformations shaping economies polities and societies Topics covered include social movements NGOs the changing nature of the state

environmental politics human rights anti globalism pandemic emergencies post Brexit politics the politics of resilience new technologies and the proliferation of progressive and reactionary forms of identity politics Drawing on disciplines including anthropology human geography political sociology and development studies this is a comprehensive and authoritative introduction to researching key issues raised by the challenge of making sense of the twenty first century futures Enough Blood Shed Mary-Wynne Ashford,2006-05-01 Enough Blood Shed confronts the reality of a world awash in weapons and the belief that war is inevitable with people powerless to change the system It provides an alternative perspective based on solutions known to be successful because they have been used already The first part of the book describes the culture of violence that has led the world to this precipice of hopelessness and then points to signs of hope that a different future is possible It outlines the steps being made to build a culture of peace including the phenomenal power of civil society the second superpower or the conscience of society Part Two then focuses on the solutions that are possible for all sectors of society For individuals including women children and youth For schools educators activist groups and religious organizations For the media professionals business and labor For cities nations and the global community Focusing on the power of ordinary people to make a difference and packed with effective nonviolent success stories often in a setting of hate and provocation the book provides guidance inspiration hope and empowerment that peace is not only possible but can be fun along the way Routledge Handbook of Non-Violent Extremism Elisa Orofino,William Allchorn,2023-03-09 This Handbook provides the first in depth analysis of non violent extremism across different ideologies and geographic centres a topic overshadowed until now by the political and academic focus on violent and jihadi extremism in the Global North Whilst acknowledging the potentiality of non violent extremism as a precursor to terrorism this Handbook argues that non violent extremism ought to be considered a stand alone area of study Focusing on Islamist Buddhist Hindu far right far left environmentalist and feminist manifestations the Handbook discusses the ideological foundation of their war on ideas against the prevailing socio political and cultural systems in which they operate and provides an empirical examination of their main claims and perspectives This is supplemented by a truly global overview of non violent extremist groups not only in Europe and the United States but also in Africa Asia Oceania and the Middle East The Handbook thus answers a call to decolonise knowledge that is especially prescient given both the complicity of non violent extremists with authoritarian states and the dynamic of oppression towards more progressive groups in the Global South The Handbook will appeal to those studying extremism radicalisation and terrorism It intersects several relevant disciplines including social movement studies political science criminology Islamic studies and anthropology **The Catholic Case against War** David Carroll Cochran,2024-03-01 The Catholic Case against War demonstrates how the Catholic mantra Never again war reflects a set of powerfully realistic teachings on war and peace Over the last five decades the Catholic Church has emerged as a powerful critic of war and as an advocate for its alternatives At the same time researchers of armed conflict have produced a

considerable body of scholarship on war and its prevention The Catholic Case against War compares these seemingly disparate lines of thought and finds a remarkable harmony between the two Drawing on years of Vatican documents and papal statements political scientist David Carroll Cochran clearly presents the key elements of the Church's case against war Far from a naive optimistic call for peace these teachings are consistent with the empirical research on the realities of contemporary warfare The result is a look not only at the explicit moral case against war developed by the Vatican but also at its remarkable realism and relevance to world conflict today
