Making Young Voters John B. Holbein, D. Sunshine Hillygus, 2020-02-20 In 2016 90% of young Americans reported an interest in politics 80% intended to vote Yet only 43% of people between the ages of 18 and 29 ended up actually casting a ballot *Making Young Voters* investigates what lies at the core of this gap The authors in depth

interdisciplinary approach reveals that political apathy is not the reason for low levels of youth turnout. Rather, young people too often fail to follow through on their political interests and intentions. Those with noncognitive skills related to self-regulation are more likely to overcome internal and external barriers to participation. This book combines theory from psychology, economics, child development, and more to explore possible solutions rooted in civic education and electoral reform. This potentially paradigm-shifting contribution to the literature of American politics serves to influence not only our understanding of voter turnout but also the fundamental connections between the education system, electoral institutions, and individual civic behavior in a democracy. How young people vote affects not only each individual's future but that of the United States and of us all. North Carolina Public Schools, 1954 *Telling Time Through the Ages* Rebecca Weber, 2011. Approximately 5,000 to 6,000 years ago, people began to make clocks, tools that can precisely mark off equal lengths of time. In this book, you will find out about several types of clocks invented throughout history. You will also discover that you can make some of these clocks yourself by following step-by-step instructions. You will even measure your body clock.
