Walden Warming Climate Change Comes To Thoreaus Woods:

Walden Warming Richard B. Primack, 2020-03-04 An unnervingly close to home perspective on the dynamics and impact of climate change on plants birds and myriad other species including us Booklist In his meticulous notes on the natural history of Concord Massachusetts Henry David Thoreau records the first open flowers of highbush blueberry on May 11 1853 If he were to look for the first blueberry flowers in Concord today mid May would be too late Warming temperatures have pushed blueberry flowering three weeks earlier and in 2012 following a period of record breaking warmth blueberries began flowering on April 1 six weeks earlier than in Thoreau s time In *Walden Warming* Richard B Primack uses Thoreau and Walden icons of the conservation movement to track the effects of a warming climate on Concord s plants and animals with the notes that Thoreau made years ago transformed from charming observations into scientific data sets Primack finds that many wildflower species that Thoreau observed including familiar groups such as irises asters and lilies have declined in abundance or disappeared from Concord Primack also describes how warming temperatures have altered other aspects of Thoreau s Concord from the dates when ice departs from Walden Pond in late winter to the arrival of birds in the spring to the populations of fish salamanders and butterflies that live in the woodlands river meadows and ponds Demonstrating the effects of climate change in a unique concrete way using this historical and literary landmark as a touchstone Richard Primack urges us to heed the advice Thoreau offers in *Walden* to live simply and wisely In the process we can minimize our own contributions to our warming climate
