The Settlement of the American Continents C. Michael Barton, Geoffrey A. Clark, David R. Yesner, Georges A. Pearson, 2016-03-04 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers

researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans

An Archaeology of the Cosmos Timothy R. Pauketat,2013

An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how

relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past
