measurements that you can use as a guide The refrigerant gas inside the air conditioner does not get wasted it only circulates throughout the system If it does not cool that does not mean that the refrigerant has leaked out it could be something else Production of R22 refrigerant has decline since 2010 meaning that the companies will no longer produce R22 refrigerant in the near future However new refrigerants have come out since then on this book we are going to mention two new refrigerants 407C and 410A these new refrigerants are not a drop in they can only be installed with new air conditioning equipment but some information can be used for other refrigerants
