User Interface Management and Design David A. Duce, M. Rui Gomes, F. Robert A. Hopgood, John R. Lee, 2012-12-06 This volume is a record of the Workshop on User Interface Management Systems and Environments held at INESC Lisbon Portugal between 4 and 6 June 1990 The main impetus for the workshop came from the Graphics and Interaction in ESPRIT Technical Interest Group of the European Community ESPRIT Programme The Graphics and Interaction in ESPRIT Technical Interest Group arose from a meeting of researchers held in Brussels in May 1988 which identified a number of technical areas of common interest across a significant number of ESPRIT I and ESPRIT II projects It was recognized that there was a need to share information on such activities between projects to disseminate results from the projects to the world at large and for projects to be aware of related activities elsewhere in the world The need for a Technical Interest Group was confirmed at a meeting held during ESPRIT Technical Week in November 1989 attended by over 50 representatives from ESPRIT projects and the Commission of the European Communities Information exchange sessions were organized during the EUROGRAPHICS 89 conference with the intention of disseminating information from ESPRIT projects to the wider research and development community both in Europe and beyond

Designing Usable and Secure Software with IRIS and CAIRIS Shamal Faily, 2018-04-28 Everyone expects the products and services they use to be secure but building security in at the earliest stages of a system s design also means designing for use as well Software that is unusable to end users and unwieldy to developers and administrators may be insecure as errors and violations may expose exploitable vulnerabilities This book shows how practitioners and researchers can build both security and usability into the design of

systems It introduces the IRIS framework and the open source CAIRIS platform that can guide the specification of secure and usable software It also illustrates how IRIS and CAIRIS can complement techniques from User Experience Security Engineering and Innovation Entrepreneurship in ways that allow security to be addressed at different stages of the software lifecycle without disruption Real world examples are provided of the techniques and processes illustrated in this book making this text a resource for practitioners researchers educators and students Software Engineering Research, Management and Applications 2010
