Sweeting,2015-04-17 Seven decades after World War II we now know that the margin between Allied victory and defeat was often narrower than many realized The decisive actions of leaders generals and war heroes have been well documented but less well known are the technological developments that made victory possible and laid the groundwork for postwar progress Based on more than ten years of research this book describes how American airmen became the best outfitted aviators of the war tracing the development of virtually every piece of personal equipment used by United States air forces Drawing on original sources including formerly classified documents the author details the myriad types of respirator equipment parachutes body armor pressure suits and other flying and survival gear that were instrumental in making U S pilots and air crews effective Personal anecdotes bring to life the design and testing of combat flight equipment More than 160 photographs are included most published here for the first time **Handbook of Fuels** Barbara Elvers,Andrea Schütze,2021-12-20 A guide to industrially relevant products and processes for transportation fuels The Handbook of Fuels offers a comprehensive review of the wide variety of fuels used to power vehicles aircraft and ships and examines the processes to produce these fuels The updated second edition reflects the growing importance of fuels and fuel additives from renewable sources New chapters include information on current production technology and use of bioethanol biomethanol and biomass to liquid fuels The book also reviews novel additives and performance enhancers for conventional engines and fuels for novel hybrid engines This comprehensive resource contains critical information on the legal safety and environmental issues associated with the production and use of fuels as well as reviewing important secondary aspects of the use and production of fuels This authoritative guide includes contributions from authors who are long standing contributors to the Ullmann's Encyclopedia the world's most trusted reference for industrial chemistry This important guide Contains an updated edition of the authoritative resource to the production and use of fuels used for transportation Includes information that has been selected to reflect only commercially relevant products and processes Presents contributions from a team of noted experts in the field Offers the most recent developments in fuels and additives from renewable sources Written for professionals in the fields of fossil and renewable fuels engine design and transportation Handbook of Fuels is the comprehensive resource that has been revised to reflect the recent developments in fuels used for transportation

Operation Crossbow Allan Williams, 2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham Buckinghamshire is one of the great lost stories of the Second World War At its peak in 1944 almost 2 000 British and American men and women worked at the top secret Danesfield House interpreting photographs the majority stereoscopic so they could be viewed in 3D to unlock secrets of German military activity and weapons development Millions of aerial photographs were taken by Allied pilots flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe it was said that an aircraft could land the photographs be developed and initial interpretation completed within two hours marking the culmination of years of experiments in aerial intelligence techniques Their finest hour began in 1943 during the planning stages of the Allied invasion of Europe when Douglas Kendall who masterminded the interpretation work at Medmenham led the hunt for Hitler s secret weapons Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand picked team and came to involve interpreters from across the Medmenham spectrum including the team of aircraft specialists led by the redoubtable Constance Babington Smith In November that year whilst analysing photographs of Peenemunde in northern Germany they spotted a small stunted aircraft on a ramp This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France where ramps were being constructed aligned not only with London but targets throughout southern Britain Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots throughout late 1943 and 1944 V weapon launch sites were located and through countermeasures destroyed saving hundreds of thousands of lives and changing the course of the war Operation Crossbow is a wonderful story of human endeavour and derring do told for the first time
