Prevention Training Manual Dinesh Mohan, Indian Institute of Technology, Delhi, 2006 Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy makers, researchers, and practitioners need information on effective prevention measures and on how to develop, implement, and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.
