Feline Cultures Éric Baratay, 2024-07-01 Using testimonies written between the middle of the eighteenth century and the beginning of the twenty first nourished by ethology and the human and social sciences *Feline Cultures* extends the unique track of animal studies that ric Baratay pursues from book to book As with his *Animal Biographies Toward a History of Individuals* Baratay breaks the model of human exceptionalism to create innovative accounts of these animals lives in a way that challenges the reader s thinking about animals Baratay is not interested in seeing how humans think about or treat these animals Instead he chooses to observe the animal s perspective to document how individual cats have carried out their lives He writes from the point of view of these animals to understand what they felt and experienced and how they reacted Whether they be street cats farm cats pet cats companion cats or catdogs cats show a great plasticity of behavior This book establishes that cats have their own cultures and adaptations and therefore their own history Through tight portraits the dynamic construction of what we can call cultures is revealed Here we are far from the eternal portrait of the cat independent unpredictable and mysterious that has become commonplace For each of the domestic

cats whose existence can be reconstructed from his sources Baratay pays attention to their perceptions of the world their sensations and their emotions their sensitivity and character their bodily expressiveness and their interactions with the environment other animals and humans Ethology becomes under the alert pen of ric Baratay an ethnology The Cambridge Handbook of Sociology: Volume 2 Kathleen Odell Korgen,2017-08-11 Whether a student an instructor a researcher or just someone interested in understanding the roots of sociology and our social world The Cambridge Handbook of Sociology Volume 2 is for you This second volume of the Handbook covers specialties within sociology and interdisciplinary studies that relate to sociology It includes perspectives on race class feminist theories special topics e g the sociology of nonhuman animals quality of life social indicators research the sociology of risk the sociology of disaster the sociology of mental health sociobiology the sociology of science and technology the sociology of violence environmental justice and the sociology of food the sociology of the self the sociology of the life course culture and behavior sociology s impact on society and related fields e g criminology criminal justice studies social work social psychology sociology of translation and translation studies and women and gender studies Each essay includes a discussion of how the respective subfield contributes to the overall discipline and to society Written by some of the most respected scholars teachers and public sociologists in the world the essays are highly readable and authoritative
