The Polish Humboldtian University in the Face of Paradigmatic Change Aleksander

Kobylarek,2017-03-07 The Polish university is based on the Humboldt model and can serve as a typical example of liberal education throughout Central and Eastern Europe This book portrays an institution resistant to change and defying all attempts at reform Currently it is attempting to retain its identity with no regard to the rapidly changing world of science culture and communication technologies that surrounds it The absolute power of the professor excessive administration and feudal subordination mean that such universities have lost touch with the local environment and have become a factory for graduates with a random education Power games and resentment have replaced the search for scientific truth which in turn means that such institutions are practically invisible in the rankings because of the lack of significant achievements This situation has led to proposal here of a redefinition of the function of the university based on a thorough analysis of needs of all its various groups of stakeholders *Digital Culture: Understanding New Media* Creeber, Glen,Martin,

Royston,2008-12-01 From Facebook to the iPhone from YouTube to Wikipedia from Grand Auto Theft to Second Life this book explores media s important issues and debates It covers topics such as digital television digital cinema game culture digital democracy the World Wide Web digital news online social networking music multimedia and virtual communities

Understanding Anxiety, Worry and Fear in Childbearing Kathryn Gutteridge,2019-11-04 This book informs and enlighten health professionals on how the recognition of fearing women can change their episode of care during childbearing It gives practical advice on the way women present to services and the challenges that this invokes This work is the first of its kind aimed at clinicians to deconstruct ideology around childbearing myths and its challenges The authors review the evidence that exists and how modern maternity systems are responding to fear and shaping healthcare Whilst some worry and anxiety is expected and indeed considered normal during childbearing it has been suggested that this has now proliferated to a degree of abnormal for many women Why is that and how is this panic spread Media portrayal of birth is suggested as unrealistic material and to show only that which is dramatic and horrific This has been considered as one factor influencing modern women Medicalisation technology and demand upon services is another consequence of providing almost all maternity care in hospitals Given that the majority of childbearing women are fit and healthy is this another causative factor By removing women from their homes and families at such a vulnerable time has a serious consequence for how she will experience her greatest leap of faith into motherhood All of these issues are explored and examined in the book with ideas and practical suggestions of what may be done to change this increasingly common problem This book is intended at midwives and clinicians working in maternity settings **Media in Process** Sai Felicia Krishna-Hensel,2016-09-19 The post

communist development of media systems has been uneven in the countries of the region Television and newspapers together with the emergence of social media have had great influence on the political debate in various countries Ownership of the media has been a factor in many instances The integration of traditionally isolated Central Eastern Europe into larger worldwide trends has fundamentally changed the way we look at the media in this region This volume proposes to address

the transition of the media and communication industries in the contemporary period The contributions discuss among other things the obstacles that still remain for the media to play an effective watchdog role in the new democracies and whether the advent of the Internet and social media has helped or hindered the transformation to a powerful independent media The discussion further examines whether advertising agencies have targeted post communist citizens differently than those in Western European countries and if the media markets in the post communist region are fundamentally different than in Western Europe and North America A second focus of the volume is the media coverage of social issues like domestic violence which is intended to draw attention to these issues and influence policy in a more aware and open society This establishes the trend of post communist media following the example of western media practice The implications of the Central European media transformation for the newly transforming media markets in the post Soviet space suggest a new phase in the development of the medium The impact of global influences on regional expression is an important aspect of the political and social changes that are underway This volume makes an important interdisciplinary contribution in examining the development of the media

Social Media in South India Shriram Venkatraman, 2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life While certain class tensions have emerged in response to this juxtaposition a study of social media in the region suggests that similarities have also transpired observed most clearly in the blurring of boundaries between work and life for both the old residents and the new Venkatraman explores the impact of social media at home work and school and analyses the influence of class caste age and gender on how and which social media platforms are used in different contexts These factors he argues have a significant effect on social media use suggesting that social media in South India while seeming to induce societal change actually remains bound by local traditions and practices
