themselves and their departments *Understanding Human Information Behavior* Beth St. Jean, Ursula Gorham, Elizabeth Bonsignore, 2021-03-25 This introductory textbook aims to provide undergraduate students in information science and related disciplines with an applied grounding in information behavior. The book's primary focus is to provide explicit links between information behavior and the careers that students will pursue within the information professions. With a deeper understanding of information behavior, students will be better equipped to address the many types of barriers that frequently prevent people from effectively and efficiently accessing, understanding, managing, and/or using the information they need in the real world. The first six chapters of the book provide students with the fundamental building blocks of information behavior: introduce them to important related concepts and provide a deep dive into information literacy, digital literacy, the digital divide, and digital inclusion. Chapters 7 through 12 introduce students to the scholarly communication system, providing guidance on how to find, read, and critically evaluate information behavior studies. Also explored in these chapters are the various methods used to investigate and understand people's information behaviors. Topics covered include research design, research methods, research ethics, user needs assessment, and human computer interaction and associated design methods. This part of the book also covers some of the major information behavior models and theories that have been developed to describe, predict, and/or explain people's information behaviors. In chapters 13 through 16, the authors provide an in-depth look into their own information behavior research areas, including consumer health, information behavior and health justice, youth information behavior, legal information behavior, and access to justice, and information behavior in libraries. In the final chapter, students are first introduced to a wide range of careers within the information professions and then taken along on a deep dive into 10 specific jobs, with a special focus on the thread of information behavior that pervades the roles and responsibilities commonly associated with these positions. Each chapter begins with one or more scenarios illustrating concepts covered in the chapter and ends with discussion questions. **Video-Based Action Research**

Kimberly Lebak, 2024-06-25 This book introduces the use of video analysis into the popular educational research model of action research. Video analysis has become increasingly common in teacher development for reflective practice as well as within the teacher certification process as an assessment tool. Kimberly Lebak builds on this use of video with a model that integrates the opportunities afforded by action research and video analysis for meaningful teacher development. Her how-to guide brings the theoretical and practical together to show teachers how video can be a concrete artifact for unpacking and reflecting on the complexities inherent in educational contexts. Chapter content helps readers bridge the gap between research and practice. Examples of tools that can be used for getting started with video-based action research are embedded in the chapters, including planning tools to help pinpoint opportunities for using video to identify a meaningful research topic and develop a data collection plan and action plan, and reflective tools for viewing the videos from multiple perspectives. Teacher vignettes further cement the applicability of the video-based action research model. This book is ideal for use by

teachers at all stages of their careers including pre service teachers just embarking on their careers and in service teachers looking to examine and improve their practices along with the learning of their students It will have an additional benefit in teacher education programs as well as in undergraduate or graduate level action research courses by academic researchers and teacher educators

Designing and Conducting Research in Education Clifford J. Drew, Michael L. Hardman, John L. Hosp, 2008 The research process in this book begins with identification of the research question and proceeds through each step including planning data collection actual collection and analysis of the data and writing the report This text proceeds through multiple methodologies including experimental and non experimental quantitative and qualitative At every step the emphasis is on planning and executing the study Key features o Simulations and feedback that may be used in class sessions for both individual and small group participation o Pedagogy to help students plan and conduct a research project in an actual classroom o Examples that demonstrate and explain what constitutes good and poor research questions o Case studies and real life examples related to education o A Student Web site that provides students with the opportunity to interact with contemporary articles This book provides an introduction to research that emphasizes the fundamental concepts of planning and design It is designed to be a core text for the very first course on research methods

Applied Helping Skills Leah Brew, Jeffrey A. Kottler, 2016-06-23 With its practical experiential approach the Second Edition of Applied Helping Skills Transforming Lives covers the basic skills and core interventions needed to begin seeing clients By approaching therapy as an art rather than from a prescriptive diagnostic position this text encourages readers to look at every situation differently and draw from their embedded knowledge to best serve the individuals in their care Authors Leah Brew and Jeffrey A Kottler weave humor and passion into their engaging prose effectively conveying their excitement and satisfaction for doing helping work
