Frankenstein, by Mary Shelley

English III-1, Mrs. Edmonds and Mr. Oakley

People (both fictional and real-life) you should know from *Frankenstein*:

- Victor Frankenstein: creator of the creature and protagonist of the story
- Henry Clerval: Frankenstein's best friend who is murdered by the creature
- Elizabeth Lavenza: lived with Frankenstein family; married Victor
- Robert Walton: explorer who met Frankenstein on the Arctic ice
- Margaret Saville: recipient of a series of letters from her brother, Robert Walton
- Justine Moritz: wrongly executed for the murder of young William Frankenstein
- Percy Shelley: famous real-life British poet and *Frankenstein* author's husband
- Felix De Lacey: unknowingly taught the creature to read and write
- Alphonse Frankenstein: died of grief in his son's arms after learning that Elizabeth was dead
- Caroline Beaufort: Frankenstein family matriarch; Victor Frankenstein's mother
- Mary Shelley: real-life author of the novel *Frankenstein*; she wrote the story while on vacation with Percy Shelley (her husband) and Lord Byron (her friend) while on vacation in Switzerland; both Percy Shelley and Lord Byron became world-famous British poets.
- William Frankenstein: a young boy who was the creature's first victim

For the test, be prepared to write an essay to a question similar to the prompt below. We will discuss possible answers in class.

Describe the original personality of Dr. Victor Frankenstein's creature, and the changes that occurred to the creature's personality over the course of the novel.

In coming up with an answer, you might want to address the following questions: What was the creature like when he was first "born"? How did he change and why did he change? What was the creature like at the end of the novel? Be sure to mention the name of the novel and the name of the author somewhere in your answer. Also, you should give an example of an incident from the novel as an example that backs up your answer.

While reading and studying *Frankenstein* over the last few weeks, each student filled out answers to a Study Guide. Use the Study Guide to study for the test. If you lost your Study Guide, it appears below, complete with the answers to all of the questions:

Introduction, Preface, Letters

1. Why did Mary Shelley write *Frankenstein*?

2. What discussions influenced the development of her idea?

She was listening to her husband, Shelley, and Lord Byron talk about the nature of life, and the possibility of creating a creature.

3. In the preface, what does the author say she is trying to preserve?

In *Necessary Conditions: Teaching Secondary Math with Academic Safety, Quality Tasks and Effective Facilitation*, Krall documents the essential ingredients that produce these sorts of moments on a regular basis and for all students. They are Academic Safety, Quality Tasks and Effective Facilitation. Academic Safety: Krall implements equitable classroom experiences that help fight stigmas associated with race and gender in schools. This allows students to feel socially and emotionally secure while nurturing their identities as mathematicians and increasing engagement during classroom discussions. Quality Tasks: Teachers can adapt or create dynamic student-centered lessons that break down math into small, manageable sections, removing the frustrations felt by students who aren't considered math people. Effective Facilitation: This book shows how to incorporate teaching moves and math routines designed for engagement, persistence and interactivity. Teachers can allow students to explore safely while maintaining consistent classroom expectations. My work as a math instructional coach for a network of schools has afforded me the unique opportunity to visit exceptional teachers across the country, documenting their tasks, teaching moves and academically safe learning environments. You'll experience dispatches from these effective classrooms in which we'll observe how teachers attend to all three elements that make up the ecosystem. Richards, Kristien Zenkov, 2015-10-01 There is little doubt that the Common Core State Standards (CCSS) are a controversial entity. They are provocative for the way in which they have been developed, for the ways they are being implemented and evaluated, for their content and for their failure to explicitly consider the needs, interests and histories of diverse populations. While the CCSS continue to be problematized by critics around the country, including the editors of this volume, it is evident our nation is moving toward some would argue we have arrived at a national set of standards and/or a national curriculum. This text will be an important volume for multiple audiences in large part because it will bring together critical perspectives on the CCSS and the notion of national standards curricula. It will simultaneously provide a social justice orientation as a way to interpret the CCSS and respond to their limits while

presenting practical examples of social justice oriented CCSS focused curricula that empower diverse learners and their teachers Social Justice the Common Core and Closing the Instructional Gap will consist of chapters by classroom teachers and university scholars who portray honest engaging first person accounts of their successes and challenges connecting a social justice pedagogical orientation to the Common Core State Standards These authors candidly and passionately share the challenges of navigating between a social justice curriculum and high stakes standards and test driven environments They highlight their accomplishments that include effectively supporting students to consider social injustices and devise plans to work toward a more equitable world
