War In Heaven The Arms Race In Outer Space:

War in Heaven Helen Caldicott, Craig R. Eisendrath, 2007 When most of us think about the potential of outer space for future generations we think of world communications satellite navigation and scientific exploration U S Space Command however thinks about weapons Believing that conflict in space and wars fought from space are inevitable the president has called on the agency to weaponize outer space and thus provoke an arms race that could cost the United States trillions of dollars and could lead to the demise of the human race In *War in Heaven* a Nobel Prize nominated peace activist and a former U S foreign service officer who helped write the Outer Space Treaty of 1967 look at the history of military uses of space and the current plans for militarizing the heavens including kinetic laser nuclear bombardment and anti satellite weapons Contrary to the claims of Secretary of Defense Donald Rumsfeld that the United States faces a space Pearl Harbor Caldicott and Eisendrath show that the United States itself is today the principal obstruction to passage of an international treaty banning weapons from outer space At a time when plans to build and deploy space weapons are on the administration s agenda but only just becoming known to the general public this book will help launch a national discussion of a critical issue

Capital and the Cosmos Peter Dickens, 2023-01-01 This book offers a new understanding of society s relations with the cosmos Entrepreneurs such as Jeff Bezos and Elon Musk receive a great deal of publicity but offer unlikely and implausible visions of space tourism for the general public Meanwhile asteroids are seen as rare materials which will be extracted and used to produce untold riches for earthbound citizens The reality is rather different First there is no evidence that owners of capital are attempting to extract rare materials in the cosmos The costs would be out of this world But capital not governments is determining how outer space should be used Capital s investments in aerospace companies are actively determining forms of military interventions and the equipment used And satellite television pumps out forms of culture aimed at a global audience But these are being ignored and subverted by for example indigenous peoples In short this book sets out a new understanding of our relations with the cosmos The forces of capital are certainly powerful but at the same time they are being challenged subverted and even overturned

Weapons in Space Karl Grossman, 2011-01-04 *Weapons in Space* examines how the United States is forcing forward in violation of international treaties to militarize space Based on excerpts from U S government documents award winning investigative journalist Karl Grossman outlines the U S military s space doctrine its similarity with the original Stars Wars scheme of Ronald Reagan and Edward Teller and the space based lasers hypervelocity guns and particle beams it plans to deploy in its mission to dominate earth Grossman shows the intimate link between the militarization and the nuclearization of space and follows the flow of billions of U S tax dollars to the corporations that research and develop weapons for space His book explains the Outer Space Treaty and gives a history of the Global Network Against Weapons and Nuclear power in Space what it is doing what it plans to do and what the reader can do to challenge U S plans to turn the heavens into a war zone
