Borderline Personality Disorder Anthony W. Bateman, Roy Krawitz, 2013-05-09

Over the past two decades considerable progress has been made in developing specialist psychosocial treatments for borderline personality disorder (BPD) yet the majority of people with BPD receive treatment within generalist mental health services rather than specialist treatment centres. This is a book for general mental health professionals who treat people with borderline personality disorder (BPD). It offers practical guidance on how to help people with BPD with advice based on research evidence. After a discussion of the symptoms of BPD the authors review all the generalist treatment interventions that have resulted in good outcomes in randomised controlled trials when compared with specialist treatments and summarise the effective components of these interventions. The treatment strategies are organised into a structured approach called Structured Clinical Management (SCM) which can be delivered by general mental health professionals without extensive additional training. The heart of the book outlines the principles underpinning SCM and offers a step by step guide to the clinical intervention. Practitioners can learn the interventions easily and develop more confidence in treating people with BPD. In addition a chapter is devoted to how to help families an issue commonly neglected when treating patients with BPD. Finally the authors discuss the top 10 strategies for delivering treatment and outline how the general mental health clinician can deliver these strategies competently.

American Psychiatric Association Practice Guidelines for the Treatment of Psychiatric Disorders American Psychiatric Association, 2002

Developed by the APA to assist in clinical decision making the Practice Guidelines series has become an invaluable resource to help benchmark care strategies for 11 common mental disorders. The APA makes Practice Guidelines available to help improve patient care and give members access to the latest information and research. Intended as a professional resource and not a standard of care the Practice Guidelines provide convenient summaries of what we know about key mental disorders and the effectiveness of specific treatments. The eleven Practice Guidelines are Alzheimer's Disease and Other Dementias, Of Late Life, Bipolar Disorder, Second Edition, Borderline Personality Disorder, Delirium, Eating Disorders, Second Edition, HIV/AIDS, Major Depressive Disorder, Second Edition, Panic Disorder, Psychiatric Evaluation Of Adults, Schizophrenia, Substance Use Disorder, Alcohol, Cocaine, Opioids. These guidelines help you: Understand clinical features and symptoms; Make a confident differential diagnosis; Evaluate interventions commonly used to treat specific disorders; Select the appropriate site of service; Educate the patient and family; Assess the efficacy and risks of available medications; Develop an individualized treatment plan.

Understanding and Treating Borderline Personality Disorder John G. Gunderson, Perry D. Hoffman, 2005
