Inequality And Global Supra-surplus Capitalism E Ray Canterbury, 2018-01-18 This book is written as a sequel to John Kenneth Galbraith s The Affluent Society and provides a theoretical framework for the first time for supra surplus capitalism Conventional economics has the income and wealth distributions as givens This assumption immediately excludes such distributions from economic and social concern Occasionally economists such as Kenneth Boulding and even earlier Michal Kalecki have attempted to develop alternative perspectives in which such distributions are integral to the story and therefore have implications for public policy At the same time conventional microeconomics is a theory of price only in which economic efficiency in an engineering sense is the only value to be optimized The income or wealth distributions are given as constraints Mathematically the constraints thereafter become invisible they have no further role to play The choices that are presumed to be made are neither inhibited nor facilitated by a household s position in the income or wealth distributions This volume will explore problems with conventional theory and policy but its main thrust comprises a theory of supra surplus capitalism applicable to both developed and developing countries and its relation to inequalities worldwide

Ray Canterbury, 2011 Provides an account of the Great Recession of 2007-2010 This title presents an output employment framework for evaluating the Great
