## **Witness To Extinction How We Failed To Save The Yangtze River Dolphin:**

*Witness to Extinction* Samuel Turvey, 2009-08-13 The tragic recognition of the extinction of the Yangtze River Dolphin or baiji in 2007 became a major news story and sent shockwaves around the world It made a romantic story for the baiji was a unique and beautiful creature that features in many Chinese legends and folk tales The Goddess of the Yangtze as it was known was also the lone representative of an entire and ancient branch of the Tree of Life But perhaps the greater tragedy is that its status as one of the world's most threatened mammals had been widely recognized yet despite wide publicity virtually no international funds became available A compelling read by a young naturalist Samuel Turvey tells the story of the plight of the Yangtze River Dolphin from his unique perspective as a conservation biologist deeply involved in the struggle to save the dolphin This is both a celebration of a beautiful and remarkable animal that once graced one of China's greatest rivers its natural history and its role as a cultural symbol and also a personal eyewitness account of the failures of policy and the struggle to get funds that led to its tragic demise It is a true cautionary tale that we must learn from for there are countless other threatened species that will suffer from the same human mistakes and whose loss we shall not know until it is too late

**Witness to Extinction** Sam Turvey, 2023 *Witness to Extinction* tells the story of the plight of the Yangtze River dolphin It is both a celebration of a remarkable animal that once graced China's greatest river and a personal eyewitness account of the failures of policy and the struggle to get funds that led to the tragic demise of a species

**The Hunt for the Golden Mole** Richard Girling, 2015-11-10 Taking as its narrative engine the hunt for an animal that is legendarily rare Richard Girling writes an engaging and highly informative history of humankind's interest in hunting and collecting what prompts us to do this what good might come of our need to catalog all the living things of the natural world Girling named *Environmental Journalist of the Years* 2008 and 2009 has here chronicled through the hunt for the Somali golden mole the development of the conservation movement the importance of diversity in the animal kingdom including humankind within this realm as well as a hard look at extinction The Somali mole of the title first described in print in a text book published in 1964 had as sole evidence of its existence only the fragment of a jaw bone found in an owl pellet a specimen that seemed to have vanished as Girling began his exploration Intrigued by the elusiveness of this creature and what the hunt for the facts of its existence might tell us about extinction he was drawn to the dusty vaults of museums of natural history where the most rare artifacts are stored and catalogued as he found himself caught up in the need to track it down Part quest part travelog the book that results not only offers an important voice to the scientific debate about extinction and biodiversity it becomes an environmental call to arms

**Seven Rivers** Vanessa Taylor, 2025-09-23 A magisterial history of the seven rivers representing the great natural arteries running through civilization by virtue of the roles they have played in our shared and conflicted world history Every river deserves its own history The seven rivers in this narrative were chosen because they are major rivers that magnify the common qualities of these great natural arteries that run through civilization The Nile Danube

Niger Mississippi Ganges Yangtze and Thames are all world rivers by virtue of the roles they have each played in our shared and conflicted world history They have served as the power bases for empires and have been fought over as frontiers Their river basins those great systems of tributaries and groundwater all flowing to the main river have been plundered for their gold timber salt oil rubber and their people Vast networks have been forged between these rivers such as the deadly middle passage of the slave trade linking the Congo and Mississippi basins And rivers themselves have always had their own logic their natural beauties their floods droughts water borne diseases their tendency to silt up and mutate into marshland their marshy subsidence below the cities of the unwary their changes of course tipping points and disappearances These rivers have shaped our lives just as we have shaped theirs What follows is the story of humanity in seven rivers     **An**

**Strategies for Water Heritage** Carola Hein,2019-10-18 This Open Access book building on research initiated by scholars from the Leiden Delft Erasmus Centre for Global Heritage and Development CHGD and ICOMOS Netherlands presents multidisciplinary research that connects water to heritage Through twenty one chapters it explores landscapes cities engineering structures and buildings from around the world It describes how people have actively shaped the course form and function of water for human settlement and the development of civilizations establishing socio economic structures policies and cultures a rich world of narratives laws and practices and an extensive network of infrastructure buildings and urban form The book is organized in five thematic sections that link practices of the past to the design of the present and visions of the future part I discusses drinking water management part II addresses water use in agriculture part III explores

water management for land reclamation and defense part IV examines river and coastal planning and part V focuses on port cities and waterfront regeneration Today the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today policy makers and designers can work together to recognize and build on the traditional knowledge and skills that old structure embody This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation transformation and adaptive reuse of historic water related structures Throughout it imagines how such efforts will help us develop sustainable futures for cities landscapes and bodies of water

Last of the Giants Jeff Campbell, 2019-08-01 Today an ancient world is vanishing right before our eyes the age of giant animals Over 40 000 years ago the earth was ruled by megafauna mammoths mastodons saber toothed tigers and giant sloths Of course those creatures no longer exist and there is only one likely reason for that the evolution and arrival of the earth s only tool wielding hunter the wildly adaptive comparatively pint sized human species Many more of the world s biggest and baddest creatures including the black rhino the dodo giant tortoises and the great auk have vanished since our world became truly global Last of the Giants chronicles those giant animals and apex predators pushed to extinction in the modern era The book also highlights those giant species that remain even though many barely survive living in such low numbers that they are on the brink of leaving this world within the next few decades However there is hope for many endangered species can still be saved As it profiles each extinct and endangered animal Last of the Giants focuses on the conservation efforts that are trying to preserve the world s remaining charismatic species before they are lost forever

**Bring Back the King** Helen Pilcher, 2016-09-22 If you could bring back just one animal from the past what would you choose It can be anyone or anything from history from the King of the Dinosaurs T rex to the King of Rock n Roll Elvis Presley and beyond De extinction the ability to bring extinct species back to life is fast becoming reality Around the globe scientists are trying to de extinct all manner of animals including the woolly mammoth the passenger pigeon and a bizarre species of flatulent frog But de extinction is more than just bringing back the dead It s a science that can be used to save species shape evolution and sculpt the future of life on our planet In Bring Back the King scientist and comedy writer Helen Pilcher goes on a quest to identify the perfect de extinction candidate Along the way she asks if Elvis could be recreated from the DNA inside a pickled wart investigates whether it s possible to raise a pet dodo and considers the odds of a 21st century Neanderthal turning heads on public transport Pondering the practicalities and the point of de extinction Bring Back the King is a witty and wry exploration of what is bound to become one of the hottest topics in conservation if not in science as a whole in the years to come READ THIS BOOK the King commands it

Mammalian Evolution, Diversity and Systematics Frank Zachos, Robert Asher, 2018-10-22 There are nearly 6 000 mammalian species among them our own Research on our evolutionary cousins has a long history but the last 20 years have seen particularly rapid progress in disentangling the interrelationships and evolutionary history of mammals The present volume combines up to date reviews on mammalian

phylogenetics with paleontological taxonomic and evolutionary chapters and also summarizes the historical development of our insights in mammalian relationships and thus our own place in the Tree of Life Our book places the present biodiversity crisis in context with one in four mammal species threatened by extinction and reviews the distribution and conservation of mammalian diversity across the globe This volume is the introductory tome to the new Mammalia series of the Handbook of Zoology and will be essential reading for mammalogists zoologists and conservationists alike
