Thought Matter Conceptuality Transcendence Philosophical:

Essay on Transcendental Philosophy Salomon Maimon, 2010-04-15 Salomon Maimon was one of the most important and influential Jewish intellectuals of the Enlightenment This is the first English translation of his principal work first published in Berlin in 1790

Philosophies of Nature After Schelling Iain Hamilton Grant, 2008-12-23 A lucid and crucial account of Schelling's major works in the philosophy of nature now available in paperback

Philosophy in a Meaningless Life James Tartaglia, 2015-12-17 Philosophy in a Meaningless Life provides an account of the nature of philosophy which is rooted in the question of the meaning of life It makes a powerful and vivid case for believing that this question is neither obscure nor obsolete but reflects a quintessentially human concern to which other traditional philosophical problems can be readily related allowing them to be reconnected with natural interest and providing a diagnosis of the typical lines of opposition across philosophy's debates James Tartaglia looks at the various ways philosophers have tried to avoid the conclusion that life is meaningless and in the process have distanced philosophy from the concept of transcendence Rejecting all of this Tartaglia embraces nihilism we are here with nothing to do and uses transcendence both to provide a new solution to the problem of consciousness and to explain away perplexities about time and universals He concludes that with more self-awareness philosophy can attain higher status within a culture increasingly in need of it

Kant's Transcendental Proof of Realism Kenneth R. Westphal, 2004-12-02 This book is the first detailed study of Kant's method of transcendental reflection and its use in the Critique of Pure Reason to identify our basic human cognitive capacities and to justify Kant's transcendental proofs of the necessary a priori conditions for the possibility of self-conscious human experience Kenneth Westphal in a closely argued internal critique of Kant's analysis shows that if we take Kant's project seriously in its own terms the result is not transcendental idealism but unqualified realism regarding physical objects Westphal attends to neglected topics Kant's analyses of the transcendental affinity of the sensory manifold the lifelessness of matter fallibilism the semantics of cognitive reference four externalist aspects of Kant's views and the importance of Kant's Metaphysical Foundations for the Critique of Pure Reason that illuminate Kant's enterprise in new and valuable ways His book will appeal to all who are interested in Kant's theoretical philosophy

Principles of Non-Philosophy Francois Laruelle, 2013-05-09 Principles of Non-Philosophy is a treatise on the method axioms and objectives of non-philosophy and represents Francois Laruelle's mature philosophy As well as presenting the method and principles of non-philosophy it includes a history of the development of non-philosophy a novel conception of science a discussion of non-philosophical causality and new theories of the subject and object of thought Providing an introduction to Laruelle's novel theory of non-epistemology or unified theory of thought this volume challenges the way we think about the traditional philosophical problems Bringing together all the elements of his thought developed over twenty years and laying the foundations for his later work Principles of Non-Philosophy is arguably Laruelle's magnum opus

Making Spirit Matter Larry Sommer McGrath, 2020-10-19 The

connection between mind and brain has been one of the most persistent problems in modern Western thought even recent advances in neuroscience haven't been able to explain it satisfactorily Historian Larry Sommer McGrath's *Making Spirit Matter* studies how a particularly productive and influential group of nineteenth and early twentieth century French thinkers attempted to solve this puzzle by showing the mutual dependence of spirit and matter The scientific revolution taking place at this point in history across disciplines from biology to psychology and neurology located our mental powers in the brain and offered a radical reformulation of the meaning of society spirit and the self Tracing connections among thinkers such as Henri Bergson Alfred Fouille Jean Marie Guyau and others McGrath plots alternative intellectual movements that revived themes of creativity time and experience by applying the very sciences that seemed to undermine metaphysics and religion *Making Spirit Matter* lays out the long legacy of this moment in the history of ideas and how it might renew our understanding of the relationship between mind and brain today

Markus Gabriel's New Realism Jan

Voosholz, 2024-12-02 This is the first volume focused on Markus Gabriel's version of New Realism which spans the fields of metaphysics ontology philosophy of mind epistemology philosophy of science and meta philosophy Most of the selected contributions are directly or indirectly concerned with Gabriel's fields of sense ontology his version of a thoroughly realistic pluralism While some take up criticisms from previous debates surrounding Gabriel's philosophy and New Realism in general others advance completely new and innovative challenges for this highly systematic thinker Overall the contributions provide both a substantive commentary on Gabriel's work and a multifaceted critical assessment of its underlying ideas The book is not only an essential addition to the debate surrounding New Realism but also furthers the discussions about naturalism deflationist ontologies contextualism and mereological arguments to which Gabriel's work has contributed in recent years

Schelling and Modern European Philosophy Andrew Bowie, 2002-01-04 Andrew Bowie's book is the first introduction in English to present F W J Schelling as a major European philosopher in his own right Schelling and Modern European Philosophy surveys the whole of Schelling's philosophical career lucidly reconstructing his key arguments particularly those against Hegel and relating them to contemporary philosophical discussion For anyone interested in German romanticism and the development of Continental philosophy this is an invaluable source book The cogent and subtle argument of this book fills a major gap in our understanding of modern philosophy in which Schelling emerges as a key transitional figure

Objectivity and the Language-Dependence of Thought Christian Barth, 2014-06-03 Does thought depend on language Primarily as a consequence of the cognitive turn in empirical disciplines like psychology and ethology many current empirical researchers and empirically minded philosophers tend to answer this question in the negative This book rejects this mainstream view and develops a philosophical argument in favor of a universal dependence of language on thought In doing so it comprises insights of two primary representatives of 20th century and contemporary philosophy namely Donald Davidson and Robert Brandom Barth offers an introduction to the debate concerning the language dependence of thought

and lays the methodological foundation for the subsequent argument in favor of a universal dependence of thought on language presenting an account and defense of the transcendental method in reference to the writings of Peter F Strawson He then offers a transcendental argument in favor of a universal language dependence of thought beginning with a reevaluation of a basic idea for an argument originally presented by Donald Davidson Later two main objections to the conclusion of this transcendental argument are addressed and rejected using Robert Brandom s inferentialist and normativist account of thought and language In the course of doing so the recent debate on Brandom s work is addressed extensively and main objections to Brandom s work are presented and answered

Husserl, Kant and Transcendental Phenomenology
Iulian Apostolescu, Claudia Serban, 2020-08-10 The transcendental turn of Husserl s phenomenology has challenged philosophers and scholars from the beginning This volume inquires into the profound meaning of this turn by contrasting its Kantian and its phenomenological versions Examining controversies surrounding subjectivity idealism aesthetics logic the foundation of sciences and practical philosophy the chapters provide a helpful guide for facing current debates
