Atlantis the End of a Continent Roselis von Sass,2008-12-16 Atlantis the land that once disappeared into the sea rises and takes shape again The people who dwelled there also become alive one more time They were highly developed human beings a chosen people whose destiny is told in this account as accurately as possible The description in these pages covers a period starting about fifty years before the country submerged beneath the sea This book was written because of the persistent requests of spirits who want the truth about what happened in the past to be revealed They request insistently in order to redeem their own threads of guilt and to help others in the upcoming suffering of humanity Here on Earth we are surrounded by a great invisible world where forces and spirits who influence us for good or for evil operate Each one of us is linked to this invisible world through thoughts and intuitive feelings **AN INTRODUCTION TO ARISTOTLE'S**

METAPHYSICS OF TIME Régis LAURENT,Trista SELOUS,2015-11-06 This study of Greek time before Aristotle's philosophy starts with a commentary on his first text the *Protrepticus* We shall see two distinct forms of time emerge one initiatory circular and Platonic in inspiration the other its diametrical opposite advanced by Aristotle We shall explore this dichotomy through a return to poetic conceptions The Tragedians will give us an initial outline of the notion of time in the Greek world Fate we shall then turn to Homer in order to better grasp the complex relations between time and the religious sphere the Hero the work of the great theologian Hesiod will confirm this initiatory vision later set out in remarkable fashion by Nietzsche Myths we shall then dive deep into Pythagoreanism to complete our account Mysteries Having understood this current of thought powerfully influenced by the Iranian theogony we shall be able to discern its clear differences from the so called Ionian current and thus to move away from Plato Ideology Lastly we shall return to the early Ionian thinkers Thales and Anaximander to analyse whether this really was the vision of the world that Aristotle adopted in developing the first model of time Science In the second volume we shall see the return of the thought of the theologoi within the Aristotelian corpus itself and will question our distinction between the being and existence of time FREE EBOOK VERSION <http://editions.villegagnons.com/philosophy/htm/TRANSLATION> This book is also available in french with this title *Metaphysique du temps chez Aristote Recherches historiques sur les conceptions mythologiques et astronomiques précédant la philosophie aristotélicienne* 252p 2009 Threads of Life Richard Freadman,2001-02 Many autobiographers share profound questions about human life with their readers questions like To what extent was my life imposed on me To what extent did I bring it about through particular choices and actions through the activity of my own will Indeed the issue of the will is central to autobiographical writing and some of the greatest autobiographies give extended consideration to the will its nature its powers its limitations the forms of freedom constraint and expression it finds in various cultures its role in particular human lives In this new study unprecedented in subject and scope Richard Freadman offers the first sustained account of how

changing theological philosophical and psychological accounts of the human will have been reflected in the writing of autobiography and of how autobiography in its turn has helped shape various understandings of the will Early chapters trace narrative representations of the will from antiquity the Greeks and Augustine to postmodernism Derrida and Barthes with particular emphasis on late modernity's culture of the will Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser Roland Barthes B F Skinner Ernest Hemingway Simone de Beauvoir Arthur Koestler Stephen Spender and Diana Trilling Freadman's interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are in varying degrees agents in their own texts *Threads of Life* argues that late modernity has inherited deeply conflicted attitudes to the will Freadman suggests that these attitudes now deeply embedded in contemporary cultural discourse need reexamining In this he contends reflective autobiography has an important part to play

Managing Risk Romney Beecher Duffey, John Walton Saull, 2008-09-15 The human element is the principle cause of incidents and accidents in all technology industries hence it is evident that an understanding of the interaction between humans and technology is crucial to the effective management of risk Despite this no tested model that explicitly and quantitatively includes the human element in risk prediction is currently available *Managing Risk the Human Element* combines descriptive and explanatory text with theoretical and mathematical analysis offering important new concepts that can be used to improve the management of risk trend analysis and prediction and hence affect the accident rate in technological industries It uses examples of major accidents to identify common causal factors or echoes and argues that the use of specific experience parameters for each particular industry is vital to achieving a minimum error rate as defined by mathematical prediction New ideas for the perception calculation and prediction of risk are introduced and safety management is covered in depth including for rare events and unknown outcomes Discusses applications to multiple industries including nuclear aviation medical shipping chemical industrial railway offshore oil and gas Shows consistency between learning for large systems and technologies with the psychological models of learning from error correction at the personal level Offers the expertise of key leading industry figures involved in safety work in the civil aviation and nuclear engineering industries Incorporates numerous fascinating case studies of key technological accidents *Managing Risk the Human Element* is an essential read for professional safety experts human reliability experts and engineers in all technological industries as well as risk analysts corporate managers and statistical analysts It is also of interest to professors researchers and postgraduate students of reliability and safety engineering and to experts in human performance congratulations on what appears to be at a high level of review a significant contribution to the literature I have found much to be admired in your research Mr Joseph Fragola Vice President of Valador Inc The book is not only technically informative but also attractive to all concerned readers and easy to be comprehended at various level of educational background It is truly an excellent book ever written for the safety risk managers and analysis professionals in the engineering community

especially in the high reliability organizations Dr Feng Hsu Head of Risk Assessment and Management NASA Goddard Space Flight Center I admire your courage in confronting your theoretical ideas with such diverse ecologically valid data and your success in capturing a major trend in them I should add that I find all this quite inspiring The idea that you need to find the right measure of accumulated experience and not just routinely used calendar time makes so much sense that it comes as a shock to realize that this is a new idea Professor Stellan Ohlsson Professor of Psychology University of Illinois at Chicago

Activating Arts to Understand Disability in Africa Charlotte Baker, Elvis Imafidon, Kobus Moolman, Emelda Ngufor Samba, 2025-08-29 While Disability Studies has become more diversified in recent years contemporary debates still favour the Northern Hemisphere ignoring the lived experience of disabled people in much of the global South Few theoretical studies pay sufficient attention to the range of beliefs and attitudes towards disability in specific African contexts despite the fact that beliefs and explanations for disability permeate daily existence in sub Saharan African places and can have real consequences for persons with disabilities leading to stigmatisation marginalisation and even violence This volume is a timely intervention that seeks to address some of these imbalances and biases Through frank life writing evocative poetry and critical reflections on African arts and literatures the contributors highlight the urgent need for more culturally informed understandings of disability as a means by which to challenge existing explanations They examine the powerful role of different creative forms tools and methodologies in enhancing understandings of disability in African contexts Demonstrating the power of cultural representation in building sensitivity to the range of issues related to disability this book is of key relevance not just to scholars and students of disability studies African studies and sociology but to all who seek to advocate for social change The volume is a key outcome of the Disability and Inclusion Africa Network It is edited by Charlotte Baker Lancaster University UK Elvis Imafidon SOAS University of London UK Kobus Moolman University of the Western Cape South Africa and Emelda Ngufor Samba University of Yaound 1 Cameroon

No Woman's Land? Women's Writings and Historical Representation in World War I Denise Borille de Abreu, 2012-02-28 Women's participation in wars either directly or indirectly has been the study object of war narratives since the Classical Age This book aims to analyze women's significant role to the construction of cultural memory and how women's representations have evolved from myth since Homer until the early twentieth century when the First War was declared to the assumption of silent victims in wartime and finally to the condition of proactive members of a much dreamed society with equal opportunities for everyone This book also addresses more specifically how women war narratives of the First World War reflect upon the war trauma which brought equally disastrous consequences for women men and children and how the War contributed to the reconfiguration of women's social roles

Luck, a Secular Faith Wayne Edward Oates, 1995-01-01 In this book Wayne Oates defines luck as a secular faith examining the ways in which the idea of our experiences being based on luck dominates much of our thinking about how and why our lives develop as they do According to Oates this secular faith in luck is unhealthy and should be

countered with faith in God
