Waldbau Wissenschaftlicher Forschung Praktischer Erfahrung:

Der waldbau nach wissenschaftlicher forschung und praktischer erfahrung Anton Bühler,1922 Waldbau auf ökologischer Grundlage Norbert Bartsch,Burghard von Lüpke,Ernst Röhrig,2020-03-09 Das von Alfred Dengler 1930 begründete Buch wurde für die 8. Auflage bearbeitet, aktualisiert, deutlich erweitert und gestalterisch modernisiert. Nach einer umfassenden Einführung in die Ziele des Waldmanagements im Kontext der Geschichte des Waldbaus und den aktuellen Anforderungen liefert das moderne Lehr- und Handbuch Studierenden der Forstwirtschaft das komplette Handwerkszeug des Waldbaus: Baumartenwahl, Begründung, Verjüngung und Pflege von Waldbeständen sowie die Gestaltung der Wälder in Betriebsarten und Verjüngungsformen.

Restoration and History Marcus Hall,2010-02-01 Once a forest has been destroyed, should one plant a new forest to emulate the old, or else plant designer forests to satisfy our immediate needs? Should we aim to re-create forests or simply create them? How does the past shed light on our environmental efforts, and how does the present influence our environmental goals? Can we predict the future of restoration? This book explores how a consideration of time and history can improve the practice of restoration. There is a past of restoration as well as past assumptions about restoration, and such assumptions have political and social implications. Governments around the world are willing to spend billions on restoration projects: in the Everglades, along the Rhine River, in the South China Sea, without acknowledging that former generations have already wrestled with repairing damaged ecosystems, that there have been many kinds of former ecosystems, and that there are many former ways of understanding such systems. This book aims to put the dimension of time back into our understanding of environmental efforts. Historic ecosystems can serve as models for our restorative efforts if we can just describe such ecosystems. What conditions should be brought back, and do such conditions represent new natures or better pasts? A collective answer is given in these pages, and it is not a unified answer.

Ancient Woods, Trees and Forests Alper H. Çolak,Simay Kirca,Ian D. Rotherham,2023-03-14 From antiquity until today, trees and woods have inspired artists, writers, and scientists; they have shaped cultures and reverberated through belief systems. Yet worldwide forest cover has declined dramatically over the last 1000 years. Now primeval forests are only to be found at a few sites unreachable by humans, and even then they are affected by climate change, atmospheric pollution, and species extinctions. Nonetheless, ancient woods, trees, and forests are at the core of many global landscapes. Understanding the vital resources that they provide requires genuinely multidisciplinary research.

With contributions from major authorities in the field such as Oliver Rackham Frans Vera Elisabeth Johann George Peterken and Melvyn Jones among others this timely volume reflects on the importance of our oldest trees from a range of perspectives and varied geographical locations Individual chapters consider eco cultural heritage the archaeology of trees landscape history forest rights tree management saproxylic insects the importance of deadwood practical conservation and monitoring biodiversity wood pasture and more Fresh insights are provided from across Europe as far as Turkey Given the urgent need to understand conserve and restore ancient woodlands and trees this book will do much raise awareness foster enthusiasm and inspire wonder
