L. McClanan, 2024-06-05 Feathered with illustrations a deep dive into the meaning of this half lion half bird creature over millennia of human history Griffinology is a fascinating exploration of the mythical creature's many depictions in human culture Drawing on a wealth of historical and literary sources this book shows how the griffin has captured the imagination of

people for over five thousand years representing power transcendence and even divinity It explores the history and symbolism of griffins in art from their appearances in ancient Egyptian magic wands to medieval bestiaries and from medieval coats of arms to modern corporate logos The use of the griffin as a symbol of power and protection is surveyed throughout history and into modern times such as in the Harry Potter series Beautifully illustrated this book should appeal to all those interested in monsters magic and the mystical as well as art and history **Strange and Wonderful** Karen

Polinger Foster, 2020-05-04 Ever since the creation of the world's first botanical and zoological gardens five thousand years ago people have collected displayed and depicted plants and animals from lands beyond their everyday experience Some did so to demonstrate power over distant territories others to enhance prestige by possessing something no one had seen before Exotica also satisfied intellectual curiosity furthered scientific research and educated and entertained In addition exotica especially their state sponsored representation were often instruments of political persuasion and in turn exerted considerable influence over expansionist policies More than an account of gardens and menageries from antiquity to the present Strange and Wonderful explores the imagery of exotic flora and fauna in Western art seeking answers to certain fundamental and universal questions How do artists schooled in traditional modes of rendering the familiar deal with the new and strange Why are rare species deliberately introduced into images otherwise devoid of the unusual What is the pictorialized relationship between exotic reality and artistic imagination Karen Polinger Foster takes readers on a journey across millennia and around the globe telling fascinating stories and meeting along the way such characters as Hatshepsut's baboons Charlemagne's elephant Durer's rhinoceros and Victoria's hippopotamus What emerges is a sense of just how strong and far reaching the pull of the unknown and exotic has been across time and space Ultimately images of the wonderful reveal as much about the indigenous as they do about the strange enabling us to glimpse more vividly the power of imagination to mold the unknown to its purposes This dazzling and richly illustrated volume offers a thoughtful much needed inquiry into a very human phenomenon **Close Reading the Anthropocene** Helena Feder, 2021-06-09

Reading poetry and prose images and art literary and critical theory science and cultural studies Close Reading the Anthropocene explores the question of meaning its importance and immanent potential for loss in the new geological epoch of the Anthropocene Both close reading and scientific ecology prioritize slowing down and looking around to apprehend similarities and differences to recognize and value interconnections Here close suggests careful attention to both the reading subject and read object Moving between places rocks plants animals atmosphere and eclipses this interdisciplinary edited collection grounds the complex relations between text and world in the environmental humanities The volume's wide ranging chapters are critical often polemical engagements with the question of the Anthropocene and the changing conversation around reading interpretation and textuality They exemplify a range of work from across the globe and will be of great interest to scholars and students of the environmental humanities ecocriticism and literary studies *Bloomsbury, Beasts and British*

Modernist Literature Derek Ryan, 2022-12-15 Bloomsbury Beasts and British Modernist Literature reveals how the Bloomsbury group's fascination with beasts from pests to pets tiny insects to big game became an integral part of their critique of modernity and conceptualisation of more than human worlds Through a series of close readings it argues that for Leonard Woolf David Garnett Virginia Woolf and E M Forster profound shifts in interspecies relations were intimately connected to questions of imperialism race gender sexuality and technology Whether in their hunting narratives zoo fictions canine biographies or un entomological aesthetics these writers repeatedly test the boundaries between and imagine transformations of the human and nonhuman by insisting that we attend to the material contexts in which they meet In demonstrating this the book enriches our understanding of British modernism while intervening in debates on the cultural significance of animality from the turn of the twentieth century to the Second World War **Exiting war** Romain

Fathi, Margaret Hutchison, Andrekos Varnava, Michael Walsh, 2022-01-18 *Exiting war* explores a particular 1918-20 moment in the British Empire's history between the First World War's armistices of 1918 and the peace treaties of 1919 and 1920 That moment we argue was a challenging and transformative time for the Empire While British authorities successfully answered some of the post war tests they faced such as demobilisation repatriation and fighting the widespread effects of the Spanish flu the racial social political and economic hallmarks of their imperialism set the scene for a wide range of expressions of loyalties and disloyalties and anticolonial movements The book documents and conceptualises this 1918-20 moment and its characteristics as a crucial three year period of transformation for and within the Empire examining these years for the significant shifts in the imperial relationship that occurred and as laying the foundation for later change in the imperial system **Victorian Environmental Nightmares** Laurence W. Mazzeno, Ronald D. Morrison, 2019-05-06 The twelve essays

in *Victorian Environmental Nightmares* explore various environmental nightmares through applied analyses of Victorian texts Over the course of the nineteenth century writers of imaginative literature often expressed fears and concerns over environmental degradation in its wide variety of meanings including social and moral In some instances natural or environmental disasters influenced these responses in other instances a growing awareness of problems caused by industrial pollution and the growth of cities prompted responses Seven essays in this volume cover works about Britain and its current and former colonies that examine these nightmare environments at home and abroad But as the remaining five essays in this collection demonstrate environmental nightmares are not restricted to essays on actual disasters or realistic fiction since in many cases Victorian writers projected onto imperial landscapes or wholly imagined landscapes in fantastic fiction their anxieties about how humans might change their environments and how these environments might also change humans
