D. John Doyle

What Does It Mean To Be Human:

Journal of Philosophy, Psychology and Scientific Methods ,1922 **The Living Church** ,1917 *The Leather Workers' Journal* ,1910 What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement D. John Doyle,2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book A Philosophical Journey into the Anthropocene Agostino Cera,2023-01-09 A Philosophical Journey into the Anthropocene Discovering Terra Incognita presents the Anthropocene not only as a geological epoch but rather as the potential marker of our age and the most faithful expression of the current zeitgeist Insofar as the Anthropocene establishes that the human agency as technological omnipower represents a global geophysical force capable of altering the destiny of the Earth system the coming of this new epoch shows that technology now embodies the subject of both history and nature In this totalized form technology achieves the status of an integral epochal phenomenon the new environment for human life Agostino Cera argues that the technisches Zeitalter age of technology outlined by twentieth century philosophical thought is fully realized in the Anthropocene and that a more appropriate name for this planetary framework is therefore Technocene The book develops along four basic directions epistemological ontological anthropological and ethical It argues that the Anthropocene is something radically new a terra incognita or an epistemic hyperobject with a geo historical barycenter giving rise to an unprecedented form of reification of nature petrification of nature an unexpected version of anthropocentrism Aidocean Prometheanism and an unpredictable ethical paradox paradox of omni responsibility The American Ecclesiastical Review Herman Joseph Heuser,1949 Population in the Human Sciences Philip Kreager,Bruce Winney,Stanley Ulijaszek,Cristian Capelli,2015-03-05 The Human Sciences address problems in nature and society that often require coordinated approaches of several scientific disciplines and scholarly research embracing the social and biological sciences and history When we wish for example to understand how some sub populations

and not others come to be vulnerable why a disease spreads in one part of a population and not another or which gene variants are transmitted across generations then a remarkable range of disciplinary perspectives need to be brought together from the study of institutional structures cultural boundaries and social networks down to the micro biology of cellular pathways and gene expression The need to explain and address differential impacts of pressing contemporary issues like AIDS ageing social and economic inequalities and environmental change are well known cases in point Population concepts models and evidence lie at the core of approaches to all of these problems if only because accurate differentiation and identification of groups their structures constituents and relations between sub populations are necessary to specify their nature and extent The study of population thus draws both on statistical methodologies of demography and population genetics and sustained observation of the ways in which populations and sub populations are formed maintained or broken up in nature in the laboratory and in society In an era in which research needs to operate on multiple levels population thinking thus provides a common ground for communication and critical thought across disciplines Population in the Human Sciences addresses the need for review and assessment of the framework of interdisciplinary population studies Limitations to prevailing postwar paradigms like the Evolutionary Synthesis and Demographic Transition were becoming evident by the 1970s Subsequent decades have witnessed an immense expansion of population modelling and related empirical inquiry with new genetic developments that have reshaped evolutionary population and developmental biology The rise of anthropological and historical demography and social network analysis are playing major roles in rethinking modern and earlier population history More recently the emergence of sub disciplines like biodemography and evolutionary anthropology and growing links between evolutionary and developmental biology indicate a growing convergence of biological and social approaches to population

Freedom and Purpose Robert Gascoigne,2004 Freedom and Purpose is a contemporary introduction to Christian ethics in the Roman Catholic tradition Christian ethics is presented as a distinctive contribution to a universally human task grounded in the love of God revealed in Christ and deriving its distinct contours and motivation from the shape of Christian revelation from back cover

Loss, Trauma, and Resilience Pauline Boss,2018-08-28 All losses are touched with ambiguity Yet those who suffer losses without finality bear a particular burden Pauline Boss the principal theorist of the concept of ambiguous loss guides clinicians in the task of building resilience in clients who face the trauma of loss without resolution

Boss describes a concrete therapeutic approach that is at once directive and open to the complex contexts in which people find meaning and discover hope in the face of ambiguous losses In Part I readers are introduced to the concept of ambiguous loss and shown how such losses relate to concepts of the family definitions of trauma and capacities for resilience In Part II Boss leads readers through the various aspects of and target points for working with those suffering ambiguous loss From meaning to mastery identity to ambivalence attachment to hope these chapters cover key states of mind for those undergoing ambiguous loss The Epilogue addresses the therapist directly and his or her own ambiguous losses Closing the circle of the therapeutic process Boss shows therapists how fundamental their own experiences of loss are to their own clinical work In Loss Trauma and Resilience Boss provides the therapeutic insight and wisdom that aids mental health professionals in not going for closure but rather building strength and acceptance of ambiguity What readers will find is a concrete therapeutic approach that is at once directive and open to the complex contexts in which people find meaning and discover hope in the face of ambiguous losses
