**Transcending the Speed of Light** Marc Seifer, 2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe *Zap! Nikola Tesla Takes Charge* Monica Kulling, 2019-02-05 Growing up in Smiljan Croatia Nikola Tesla dreamed about harnessing the power of

Niagara Falls In 1884 he walked down the gangplank into the New York Harbor with four cents in his pocket a book of poems a drawing of a flying machine and a letter of introduction to Thomas Edison the electrical wizard of America Upon meeting Edison sent Tesla to fix the SS Oregon as a test and was so astounded that he offered Tesla a job at his factory Tesla and Edison had different views about electricity Tesla wanted to develop an alternate current while Edison wanted to stick to the direct current system Edison offered Tesla a large sum to make his direct current system more efficient but when the work was done Edison refused to pay Tesla quit and when things were looking bleak he met George Westinghouse who also thought that alternating current was the way to light up America He gave Tesla a job and in 1896 Tesla and Westinghouse built a generator at Niagara Falls that was able to send power as far as Buffalo New York Unmanned Systems of World Wars I and II H. R. Everett, 2015-11-13 The first comprehensive technical history of air land sea and underwater unmanned systems by a distinguished U S Navy roboticist Military drones have recently been hailed as a revolutionary new technology that will forever change the conduct of war And yet the United States and other countries have been deploying such unmanned military systems for more than a century Written by a renowned authority in the field this book documents the forgotten legacy of these pioneering efforts offering the first comprehensive historical and technical accounting of unmanned air land sea and underwater systems Focusing on examples introduced during the two world wars H R Everett meticulously traces their development from the mid nineteenth century to the early Cold War A pioneering Navy roboticist Everett not only describes these systems in detail but also reverse engineers the designs in order to explain how they operated in real world conditions of the time More than 500 illustrations photographs drawings and plans many of them never before published accompany the text Everett covers the evolution of early wire guided submersibles tracing the development of power propulsion communication and control radio controlled surface craft deployed by both Germany and Great Britain in World War I radio controlled submersibles radio controlled aircraft including the TDR 1 assault drone project in World War II which laid the groundwork for subsequent highly classified drone programs and remote controlled ground vehicles including the Wehrmacht's Goliath and Borgward demolition carriers AC/DC Tom McNichol, 2011-01-06 AC DC tells the little known story of how Thomas Edison wrongly bet in the fierce war between supporters of alternating current and direct current The savagery of this electrical battle can hardly be imagined today The showdown between AC and DC began as a rather straightforward conflict between technical standards a battle of competing methods to deliver essentially the same product electricity But the skirmish soon metastasized into something bigger and darker In the AC DC battle the worst aspects of human nature somehow got caught up in the wires a silent deadly flow of arrogance vanity and cruelty Following the path of least resistance the war of currents soon settled around that most primal of human emotions fear AC DC serves as an object lesson in bad business strategy and poor decision making Edison's inability to see his mistake was a key factor in his loss of control over the operating system for his future inventions not to mention the company he founded General
