The Cerebellum in Health and Disease William Straus Fields, William D. Willis, 1970 **Getting Through the Hurt** Silas Henderson, Francis Wagner, Keith McClellan, Ann Rohleder, Ronald Knott, 2015-07-14 Sometimes life just seems to get the best of us The wounds can cut very deep on occasion addiction divorce grief feeling unloved and unwanted and so many others And the scars may never entirely heal However our Christian faith urges us to recall that Jesus rose from the tomb with visible but transformed wounds demonstrating that nothing in life is wasted in the economy of God s mercy Getting Through the Hurt offers timely reflections on how God s grace gently permeates our wounds to give them meaning and transforms them into the means of discovering new life Ultimately God asks us to trust that His goodness will secure victory over all distress division and death and this book serves as a guide for that journey of faith *Cross Connections* James G.

Health, Disease, and the Environment in Cross-Cultural History: The Arabic-Islamic World, China, Europe, and North America Florence Bretelle-Establat, Marie Gaille, Mehrnaz Katouzian-Safadi, 2020-01-01 This book has been defined around three important issues the first sheds light on how people in various philosophical religious and political contexts understand the natural environment and how the relationship between the environment and the body is perceived the second focuses on the perceptions that a particular natural environment is good or bad for human health and examines the reasons behind such characterizations the third examines the promotion in history of specific practices to take advantage of the health benefits or avoid the harm caused by certain environments and also efforts made to change environments supposed to be harmful to human health The feeling and or the observation that the natural environment can have effects on human

health have been and are still commonly shared throughout the world This led us to raise the issue of the links observed and believed to exist between human beings and the natural environment in a broad chronological and geographical framework In this investigation we bring the reader from ancient and late imperial China to the medieval Arab world up to medieval modern and contemporary Europe This book does not examine these relationships through the prism of the knowledge of our modern contemporary European experience which still too often leads to the feeling of totally different worlds Rather it questions protagonists who in different times and in different places have reflected on their own terms on the links between environment and health and tries to obtain a better understanding of why these links took the form they did in these precise contexts This book targets an academic readership as well as an informed audience for whom present issues of environment and health can be nourished by the reflections of the past

Invading the Realm of Demons, Disease, and Death Carl E. Roemer,2024-01-29 This study of the miracles attributed to Jesus in the Gospels begins with a survey of the sciences because in our present cultural context materialism is the dominant approach to and understanding of our world of history and of our very selves If the materialist s understanding is true then there is no such thing as miracles because every event must occur as the result of some previous material events Contemporary biblical scholarship mostly approaches the miracle stories from a materialist point of view It questions their historicity because they violate what has now become the entrenched modus operandi in our culture and society operating with the idea that the universe is a closed nexus of cause and effect The miracles are understood then as products of the community and not historical reports although according to this line of scholarship they may be based on some vague recollection of Jesus s activity that somehow had healing effects Modern science however as one scientist has put it in climbing the mountain of knowledge has reached its peak and found a theologian at the top The sciences in other words have led to the implication that our universe has a creator and that the universe and the human genome have been designed
