Untangling the Web Aleks Krotoski, 2013-05-20 The World Wide Web is the most revolutionary innovation of our time In the last decade it has utterly transformed our lives But what real effects is it having on our social world What does it mean to be a modern family when dinner table conversations take place over smartphones What happens to privacy when we readily share our personal lives with friends and corporations Are our Facebook updates and Twitterings inspiring revolution or are they just a symptom of our global narcissism What counts as celebrity when everyone can have a following or be a paparazzo And what happens to relationships when love sex and hate can be mediated by a computer Social psychologist Aleks Krotoski has spent a decade untangling the effects of the Web on how we work live and play In this groundbreaking book she uncovers how much humanity has and hasn't changed because of our increasingly co dependent relationship with the computer In *Untangling the Web* she tells the story of how the network became woven in our lives and what it means to be alive in the age of the Internet [China's Cyber-wall](#) United States. The Leaderless Revolution Carne Ross, 2011-09-01 There are few books that attempt to interpret the world and how it is run *The Leaderless Revolution* offers a refreshing and potent contrast to the

Panglossian optimism of Tom Friedman's *The World is Flat* but like that book it offers a way of understanding the world of the 21st century that is both clear and easily comprehensible. Carne Ross takes different angles on contemporary issues: economics, politics, the state of democracy, the environment and terrorism, wrapping them into a unified explanation of how money and power function to control the lives of the earth's inhabitants such that they feel powerless to affect their collective future. It seems that mankind has settled upon liberal democracy as the ideal form of government. Its triumph with the collapse of communism signalled the end of ideological struggle and thus of history. *The Leaderless Revolution* will show, however, that even in democracies many if not most of the population feel that they are excluded from any agency over the issues that most trouble them while governments appear less and less able to influence the global problems that threaten our peace and comforts. Mining the rich but little examined histories of both cosmopolitanism and anarchism, *The Leaderless Revolution* shows how both ideas in combination are relevant and necessary for the problems of today. Not only an antidote to our global crises, Carne Ross offers moreover a route to fulfillment and self-realisation.

Access Controlled Ronald Deibert, John Palfrey, Rafal Rohozinski, Jonathan Zittrain, 2010-04-02. Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content and online surveillance are increasing in scale, scope and sophistication around the world in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways. China's famous Great Firewall of China is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize or even legalize Internet control, include targeted viruses and the strategically timed deployment of distributed denial of service (DDoS) attacks. Surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies and national information shaping strategies. *Access Controlled* reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

Blogging Revolution Antony Loewenstein, 2011-08-01. *The Blogging Revolution* is a colourful and revelatory account of bloggers around the globe who live and write under repressive regimes, many of them risking their lives in doing so. Antony Loewenstein's travels take him to private parties in Iran and Egypt, internet cafes in Saudi Arabia and Damascus, to the homes of Cuban dissidents and into newspaper offices in Beijing where he discovers the ways in which the internet is threatening the rule of governments. Through first-hand investigations, he reveals the complicity of Western multinationals in assisting the restriction of information in these countries and how bloggers are leading the charge for
